

Cisco Room Kit EQX

Flagship, multi-screen collaboration for any medium and large meeting room

Cisco® Room Kit EQX is a premium, integrated collaboration device solution that combines an AI-infused video conferencing system with flexible mounting options and iconic frame design to enable a flagship video meeting experiences in your medium-to-large meeting rooms and collaboration spaces.

It gives the flexibility to bring your own external displays and integrate them with a purpose-built video conferencing kit that allows your team to explore a new way to meet, share content and collaborate.

What's more, the Room Kit EQX helps you simplify meeting room video deployment, configuration and management at scale while keeping your room setup clutter-free for a premium look and feel.

This all-in-one bundle leverages the power of the Cisco Codec EQ to bring AI-infused, multi-platform collaboration natively on Cisco RoomOS or Microsoft Teams Rooms - letting you define your preferred software experience while meeting the ultimate hybrid meeting room standard across your workspaces.

Bringing the most advanced collaboration AI to your rooms

Video intelligence with AI people framing, dynamic speaker tracking, and enabling multi-camera scenarios for presenter tracking, extended speaker view or cross-view

Virtual meeting zone creation via local processing. It intelligently maps the workspace to frame only those in the meeting in glass-walled rooms and open spaces

Audio intelligence enabling spatial sound, machine learning-powered noise removal, advanced voice capture, and directional audio extension with the intelligent Cisco Table Microphone Pro

Augmented intelligence and inclusivity with voice-controlled AI assistant, immersive sharing, and natural language understanding for real-time translation and closed captioning

Designed for the ultimate, integrated hybrid work experience

AI-enhanced, cinematic meetings

A blend of meeting room AI and integrated hardware for inclusive audiovisual and rich content experiences.

Seamless deployment and configuration at scale

Flexible connectivity and simple deployment to bring clutter-free, premium design to any room at scale.

Unrivaled multi-platform experience

The native Cisco RoomOS or Microsoft Teams experience on a single device, alongside powerful video interop.

Centralized device and workspace management

Monitor, troubleshoot, and control your deployment while gaining unique workspace insights.

Unrivaled camera views and room coverage

Powerful, quad-lens camera system and smart software AI work together to capture everyone in the room in high quality, track the active speaker or frame everyone equally, even in the longest of rooms.

AI-powered meetings

Create meeting zones, solve advanced multi-camera scenarios, and leverage the power of AI noise removal to beat distraction and keep your teams focused, powered by RoomOS and an NVIDIA AI engine.

Room-filling sound, unwavering focus

Enjoy room-filling, spatial sound powered by an advanced, multi-channel loudspeaker system while capturing all voices in ultra-high quality with the latest generation of conferencing microphones.

Meetings on any platform

Get the feature-rich, Webex-first RoomOS experience combined with advanced third-party meeting interoperability, or run your device on the native Microsoft Teams Rooms experience.

Seamless deployment and configuration

Leverage flexible and elegant mounting options for wall and floor, a signature frame module that gives space for all AV components to enable simple installation and a premium, clutter-free setup in your meeting spaces.

Rich connectivity, intuitive admin

Bring your own displays and connect with multiple cameras, microphones, speakers, and other room peripherals while leveraging unified device admin and workspace management by registering in Control Hub.
