

Working better together with Webex.

Dear Colleagues,

We've all been given Cisco Webex for continuous teamwork with video meetings, group messaging, file sharing and whiteboarding. Our investment in Webex is motivated by the need to keep our people in the field connected to each other and the center to share insights and best practices.

We can use it to get help from each other to fix customer issues in real time, report a wide range of information about customers back to people that need it, and create special interest groups.

To get started and get support click here <insert links>.

Looking forward to seeing us as early adopters and pioneers of new ways to delight our customers.

Enjoy!
