

Hey finance!

Budget planning?

Share and align faster

Budget planning can be painful. It involves many stakeholders with constantly changing information. You want to stop wasting time on the “back and forth” of getting agreement. You need access to your stakeholders’ plans and updates, in real time. With easier, consistent communication on Cisco Webex, plan your budget faster.

I need to unite my stakeholders to make the tough choices.

✓ When numbers are due, connect everyone to ensure accuracy.

Create budget spaces

Download the Cisco Webex app. Have spaces for each of your teams to communicate specifically about budget.

[Download Cisco Webex](#)

[Create a team](#)

Create spaces

Share documents. Enable your stakeholders with the policy, process, and forecasting records they need for budget planning. Your space will hold all shared documents for future reference.

[Share files](#)

Get consensus

Everyone can provide feedback and document requested budget changes in the same place. Share revisions and comments on spreadsheets quickly. Ensure accuracy.

[Send a message](#)

Keep tabs on your people

When you need budget information from a specific person, @Mention them to get their attention. Mention @All to disseminate important updates and to get everyone’s eyes on the budget plan quickly.

[@Mention a person](#)

[@All to your team](#)

Plan your meeting

With one button, see the calendars of everyone in the space. Set time to discuss budget requests and goals. Your last conversation and shared priorities are documented close by when you meet in Webex. Set team time to discuss the tough topics, or call individuals on the fly.
