Cisco Webex

A new kind of science for project success. An invitation to Webex.

Dear Colleagues,

Webex is a powerful, modern messaging, and meeting solution that puts all the communications and information sharing tools we need for project delivery, all in one place.

We're rolling it out to all project managers: I encourage everyone to try it out and use it in their projects.

To get started and get support click here <insert links>. Please read the attached use case for more information about how Webex can make us more successful.

Looking forward to seeing us as early adopters and pioneers of new ways of working.

Thank you.
