Cisco Webex

Connections made closer

There's nothing more heart-warming than seeing a resident's eyes light up when family and friends visit. When visiting virtually, use a dedicated space to help residents feel like they're right there with them.

Introducing Webex devices

With HD video and crystal-clear audio, Webex devices make virtual visits the most immersive experience imaginable.

Having a dedicated space or a "Cozy Corner" combined with the large touch screen of a device ensures your resident is set up to meet with the click of a button. This space makes catching up with loved ones the next best thing to face-to-face.

Give residents the best experience for the moments that matter!
