Cisco Webex

Maximize your time with virtual connections

To ensure our residents get the care they need, use Webex videoconferencing. This will ensure they get there on time, with the right information and support... Because the visit can be virtual. This is an incredible supplement to visits done in person.

A few ideas for virtual appointments:

- Health consultation
- Post procedure check-up
- Mental wellness check
- Physical therapy

Setting up an appointment with the healthcare professional is easy. All you need is a place your residents can speak in private and a laptop, tablet or mobile device to join.

Use a virtual visit to reduce travel, wait time all while receiving the best care and treatment.

Maximize your time with virtual connections, check out our [telehealth information](#) to see how it can help you and your residents.
