

Get more from your web meetings with integrated audio.

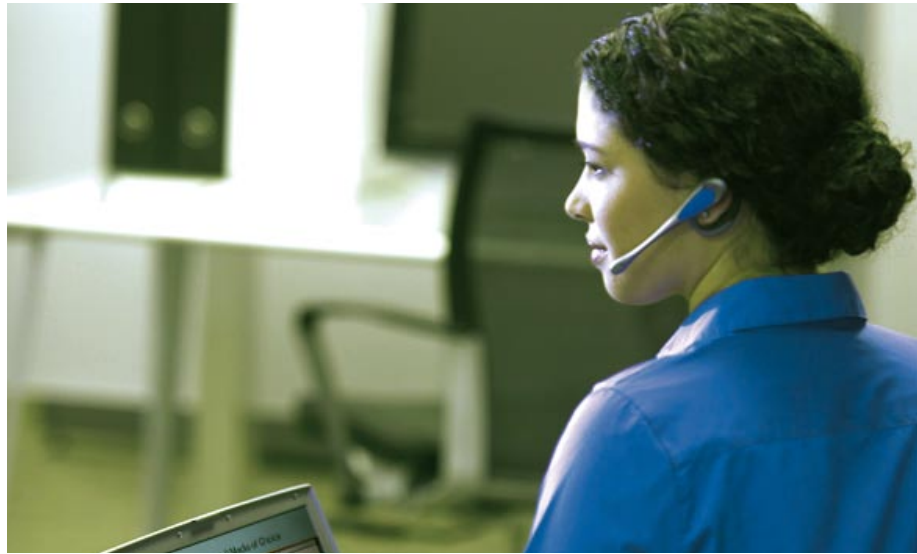

Manage all aspects of audio communication from within the meeting environment.

Make it simple to schedule and join meetings by using a cost-effective single provider for both your web meeting and audio needs.

Set up a Personal Conference Number and host audio-only meetings from any phone, on the fly or scheduled ahead.

Select audio options that meet your needs:

- Toll or Toll-free Audio Conferencing
- Integrated Voice over IP
- Audio Broadcast

Turn your business efficiency up an extra notch. Make WebEx Audio services part of a complete WebEx solution. You'll simplify the meeting process and create a superior meeting experience.

Pair WebEx Audio services with any WebEx web meeting application — and get even greater value from your WebEx solution. You'll be able to visibly control all call activity and manage audio activity from within the meeting environment. Easily invite late-comers, call out to subject matter experts, and proactively mute and activate audio lines to ensure the highest levels of productivity.

Use in-meeting audio controls to ensure a quality meeting experience. Easily identify the current speakers with the Active Talker feature. Increase call security with visual verification of all attendees. And prevent unauthorised access to calls and web meetings.

Select from a broad range of audio services to best meet your budgetary and business needs. Let participants call in to a toll-free conference bridge, join an integrated Voice over IP (VoIP) session or have them provide a number to receive an automated callback. With global coverage, you can provide local, call-in numbers for your international participants.

Scale your audio meetings from small, collaborative conferences to large, global events with up to 500 callers. Choose audio broadcast to reach even more participants at a fraction of the cost of traditional audio conferencing.

Minimise scheduling hassles. Maximise your meeting experience.

Drive time and cost savings by using a single interface for both the audio and web portions of your meeting. You'll save your users the hassle of scrambling for separate web meeting and audio conferencing information. Take advantage of integration with Outlook and other popular applications to simplify scheduling even further. Or, host ad-hoc meetings including reservationless audio.

Hold audio-only calls any time, any place.

Extend the value of your WebEx Audio service. Use your WebEx audio conferencing account to hold audio-only meetings, too. You can schedule these calls in advance or start them instantly from any phone

Choose WebEx audio conferencing for simplicity, convenience, and flexibility.
