

Webex Go with AT&T

Unrivaled Mobile Collaboration

[Webex Go with AT&T](#) natively integrates Webex Calling with AT&T network to deliver unrivaled mobility experiences for today's modern workers.

Webex Go with AT&T extends [Webex enterprise-grade calling](#) capabilities to AT&T provided data plans and mobile phones via a single business phone number that becomes your identity for all Webex communications. You can make and receive calls using your mobile phone's native dialer and stay connected on the go. All calls will be routed via AT&T's secure, fast, reliable 5G nationwide network so you will experience clear audio quality when placing and receiving calls on your mobile device.

Built for today's mobile workforce, your business mobile phone becomes part of the Webex ecosystem, giving you access to the complete and powerful Webex experience while collaborating on the go. You can seamlessly move the call to the Webex App or a Webex Device or elevate the call to a Webex Meeting to enjoy the rich Webex collaboration experience.

Webex Go with AT&T eliminates the need for a traditional fixed business line and help companies simplify their mobile strategy and experience cost savings. It also removes the burden on IT by providing a fully compliant and secure mobile device along with centralized, easy provisioning and management in Webex Control Hub with complete access to real time troubleshooting and analytics.

Mobile first, experience

Enterprise grade calling

Crystal clear audio

Secure, compliant and fully managed

*Webex Go with AT&T and AT&T Cloud Voice with Webex Go is enabled at no additional charge or cost but does require the subscriber to purchase an authorized AT&T Business Wireless CRU mobile plan, device from AT&T or authorized AT&T Partner and secure the necessary Webex Suite/ Calling and Webex Go Add-on Licenses from Webex VAR/Reseller that enables the Cloud Voice with Webex Go Bolt-on

*Webex Go with AT&T is planned to be available in Q4 2023

*Webex Go with AT&T is referenced as "AT&T Cloud Voice for Webex Go" by AT&T

Greater flexibility for the modern workforce.

Seamlessly connect and work from anywhere, on your mobile device.

Mobile first collaboration: Access Webex Calling features on your business mobile device and stay connected and collaborate from everywhere

A single number: The AT&T mobile plan and number is elevated to become the Single number identity for Webex and extends enterprise-grade calling capabilities natively to users in the United States

Crystal clear audio: Experience superior call quality powered by AT&T's fast, reliable, and secure network

Compliant and secure: Collaborate with peace of mind knowing your communications are secure and compliant

Powerful enterprise-grade calling: Access complete cloud calling features on your device's native dialer

Immersive collaboration experience: Make a call, transfer to another device, or seamlessly elevate to a video meeting on the Webex App

Ease of management: Easy provisioning and management with access to real-time troubleshooting and analytics

Combined call history and voicemail: Centralized access to call history and voicemails in the mobile native dialer and Webex App

Extension dialing: Contact your co-worker or a group within your organization by dialing their extension

Synchronized Presence: When you're on a call on your business mobile phone, your Webex availability reflects 'on-a call' status on the Webex App and Webex Devices

Compliance call recording: Set policies for recording based on business needs and have immediate access to download, replay and analyze any calls
