

Enhance your collaboration experience with Webex Meetings PWA on Chrome OS

Webex on Chromebooks

Easily collaborate in real-time from anywhere on your Chromebook through Webex Meetings Progressive Web App (PWA) built specifically for all Chrome OS devices. Enjoy the best video conferencing experience presented like a desktop application so you can have the best of both worlds—the simplicity of web-based technology and the robustness of local applications.

Access a meeting with just one click on the Webex Meet icon on your launcher or shelf.

Simply tap on sign-in or join with meeting number or meeting URL.

Multitask effectively by keeping your workstreams across the browser tabs separate from the live interactions in meetings.

Collaborate in real-time on your Chromebooks with absolute ease

- Be heard during meetings—even in the noisiest environments—with the advanced noise removal
- Share individual windows, applications, or your entire computer screen in real-time
- Instantly translate your meeting into 100+ languages from 13+ spoken languages to enhance live collaboration
- Automatically take notes and action items with the Webex Assistant so you can stay focused on your conversations
- Record meetings so everyone can quickly catch up on what they missed
- Work with your teams on projects on your most common business apps for brainstorming, emails, project management, and more without leaving the Webex Meetings PWA
