

Webex Calling in Microsoft Teams

Elevate Teams with the enterprise grade Webex Calling experience

Webex Calling offers an enterprise grade calling experience on the trusted platform used by over 45 million cloud calling users worldwide. Delivered through a global infrastructure of 16 data centers with service in over 120 countries around the world, Webex Calling provides unparalleled reliability and geographic coverage.

Microsoft Teams users now have access to a comprehensive Webex Calling experience through our enhanced integration. Accessible with a single click from within the Microsoft Teams interface, users have access to Webex Calling features like mid-call control, voicemail, call history, directory search, and our market-leading Audio Intelligence noise removal technology.

Seamlessly integrated into the Microsoft Teams interface, businesses can now provide users with the proven, reliable enterprise calling experience they need with Webex Calling directly from within Microsoft Teams.

45M+

cloud calling users

120+

countries supported by Webex Calling

Seamless integration

Access a complete Webex Calling experience with a single click in the Microsoft Teams interface.

Enterprise grade calling

Deliver a reliable calling experience on the proven platform used by over 45 million people worldwide.

Hear and be heard

Deliver best-in-class noise removal technology so your callers can communicate clearly.

Enterprise calling without compromise.

Webex Calling integration with Microsoft Teams provides users with a best-of-breed calling experience through the Microsoft Teams interface. It's included at no additional cost for Webex Calling, Webex for BroadWorks, and Cisco Unified Communications Manager. This new Teams experience will be launched over the next several months. New features like call history and voicemail are available now. Our new landing page with presence and call settings is coming soon.
