# Webex Desk Pro for healthcare

# Introducing the Webex Desk Pro

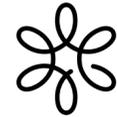

## The instant provider office

The Webex® Desk Pro is the perfect device for local and remote care providers. Customizable for healthcare settings and provider offices, it provides medical practitioners with the ability to extend an exceptional remote care experience, connect with experts for second opinions, and allows for easy content sharing.

The Webex Desk Pro comes with features specifically designed for healthcare, including the ability to switch out the speaker cover from fabric to a wipeable metal for use in clean environments and deactivate buttons to avoid unnecessary tampering. The 4K 27-inch anti-glare display is ideal for in-room content and document sharing and as a primary monitor with a laptop connection. Use the Webex Desk Pro on a mobile cart in an examination room, on a physician desktop, or in a shared huddle space.

# Benefits

## All-in-one solution

Video conference, call, share content, whiteboard, and annotate on files.

## Easy to use

A fully touch-based system, with a one-button-to-push meeting-join experience.

## Versatile, multipurpose device

The Webex Desk Pro offers the flexibility to be your primary video system and connects to laptop-based video conferencing software via USB.

## Customizable for healthcare

Web app integrations provide quick access to medical records; metal, wipeable speaker covers for clean environments; VESA mountable.

Your primary monitor

Dual display

Collaborative sharing

Directional speakers

Dynamic best view

USB-C accessibility

- Share: Extend your laptop
- Touch: Windows touch redirect
- Charge: Laptop and Phone

## Background blur and virtual backgrounds

All that clutter in the background is distracting and takes away from focusing on the conversation. Our new camera focuses on the individual and blurs out everything else in the background. You can also select one of the virtual backgrounds we've included or upload a background of your choice.

## Audio fencing and AI-powered noise suppression blocks out background noises

Wherever you are, background noise can happen. The Webex Desk Pro detects and blocks background noises from disrupting your conversation.

## Automatically frames you in the best view

There's no need to be an expert videographer. The Webex Desk Pro is designed to keep you in frame whether you're sitting, standing, or moving around the office. The camera automatically adjusts to your height, so go ahead and stand up or move back in your chair.

## Automatic light compensation

Don't worry about bringing in extra lamps or positioning a desk away from sun. The system automatically adjusts to the environment, so you are presented visibly clear and without shadows.

## Touch screen with USB-C redirect

This feature adds tablet functionality to your computer so you can move files or annotate on documents with the dedicated stylus or your finger, without losing the functionality of your mouse and keyboard.

## Use your voice

You no longer need to look up the number you are calling or the meeting information to join a conference. Just say, "Okay Webex, join my meeting," and the Webex Desk Pro will join the meeting on your calendar. Or say, for instance, "Call Bob," and the Webex Desk Pro will give you the option of which person to call based on your interactions.

## Dual display

HDMI-out provides the option to have a dedicated screen for dual-display content sharing so you can maintain a high-quality face-to-face interaction when content is shared.
