Digital whiteboarding for hybrid teams

Teams work better when ideas are freely shared
With Webex, you can harness the collective power of teams to get stuff done. Everyone can participate live wherever they are at home, in a local coworking space or in a meeting room.

Explore concepts, create designs, and engage in group problem-solving on an infinite canvas using your preferred device, whether that’s a smartphone, tablet, laptop, Webex® Desk Mini, Webex Desk, Webex Desk Pro, or Webex Board Pro. The Webex Whiteboard is also offered as a web application, so you can quickly access and create whiteboards without having to download any software.

When the meeting is over, take your ideas with you. Webex safely and securely stores your creations so you can access your whiteboards wherever and whenever inspiration strikes.

“The Webex Board has everything teams need to collaborate, including intuitive whiteboarding, high-quality video conferencing, and integrated web applications. From our evaluation, the Webex Board is best in class for every deployment scenario and has everything you need to bring people together and inspire creativity.”

Webex devices

Designed to bring ideas to life

Creative collaboration isn’t confined to the office. Keep ideas flowing while your teams are apart with Webex. In-person and remote teams can simultaneously ideate, iterate, and collaborate on content and whiteboards while you work face-to-face with high-quality video conferencing.

You and your team can work and brainstorm together effortlessly and keep your ideas flowing without ever running out of space to capture them. Need to see the detail? No problem. Pinch and zoom—you’ll never have to miss a thing.

Webex Desk Mini

Room types: Small shared spaces in-office or at home
Display: 15-inch, 1080p touch display
Best for: Portability around the house and the office so you can take meetings and co-create from any space

Webex Desk

Room types: Personal office or small shared spaces
Display: 24-inch, 1080p touch display
Best for: Bringing high-quality video conferencing and co-creation capabilities to the home office, office desks, and small shared spaces

Webex Desk Pro

Room types: Personal office or small shared spaces
Display: 27-inch, 4K touch display
Best for: Executive offices and small shared spaces where two people can gather to join video meetings and co-create

“If you’re looking for a way to take your investment in the new digital workplace to the next level, Webex Desk Pro has everything you need, from noise-cancelling audio to video streaming and instant touch-based annotations for your workflow.”

Webex whiteboard

Today, collaboration can happen anywhere, and at any time

Whether you are working together in a meeting room, or you are in a video meeting with remote participants, or you are building upon each other’s ideas over time individually—you need tools that embrace both real-time and asynchronous collaboration.

Webex Whiteboard provides teams with a single surface for everyone to collaborate on in real-time or at their leisure. The new Webex whiteboarding solution is built for people to capture ideas, organize information and allow teams to provide feedback from wherever they are. The Webex Whiteboard is available as a web app, integrated into your Webex workflow, and on the Webex Board and Desk Series.

Digital whiteboarding powers all types of teamwork—from anywhere

Table 1. Features and benefits

<table>
<thead>
<tr>
<th>FEATURE</th>
<th>BENEFIT</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Brainstorming</strong></td>
<td>Gather teams to generate ideas or problem-solve. The digital whiteboard lets teams brainstorm in a freeform fashion on an infinite canvas.</td>
</tr>
<tr>
<td><strong>Agile teams</strong></td>
<td>Agile teams can quickly access their favorite project management tool through integrated web apps and draw, annotate, or share ideas seamlessly.</td>
</tr>
<tr>
<td><strong>Education and distance learning</strong></td>
<td>The physical blackboard has has its limitations. With Webex, you can instruct students with the digital whiteboard where your files are saved and can be shared with the entire class after the session. Bring in experts from around the world to share their knowledge with students.</td>
</tr>
<tr>
<td><strong>Design teams</strong></td>
<td>Co-create on design files with remote teams and bring new concepts to life. Use the dedicated stylus and touch-based pinch and zoom for details and precision. With seamless integration into third party design and collaboration applications, such as CAD software, Miro, and MURAL, teams can easily collaborate using the tools they love.</td>
</tr>
<tr>
<td><strong>Ideation and co-creation</strong></td>
<td>Share ideas and collaborate across distances without the fear of losing your work. Your creations are automatically saved in Webex or choose to email them to anyone.</td>
</tr>
<tr>
<td><strong>Healthcare</strong></td>
<td>Make remote care personal. Webex devices provide medical practitioners with the ability to extend an exceptional remote care experience, connect with experts for a second opinion, and allow for easy content sharing and annotation.</td>
</tr>

Features of the Webex Board and Webex Desk Series

The Webex devices portfolio runs on RoomOS, which delivers the same, seamless collaboration experience across devices and spaces, from the personal office to the meeting room. The following capabilities are available on Webex Board Series and Webex Desk Series all-in-one devices, powered by RoomOS:

**Pervasive digital whiteboard**

Easily whiteboard with the dedicated stylus or your finger and your content is automatically saved to a Webex virtual space. Multiple people can whiteboard at the same time—in the room or remotely with Webex.

**Video conferencing**

Unlike other collaboration displays, Webex devices are designed to deliver a face-to-face experience that rivals in-person meetings. With high-quality video and audio, your whiteboarding session isn’t just about the whiteboard—it’s about bringing people together around an idea.

**Wireless sharing**

No wires, no problem. Share content locally in the room or remotely, without any need for cables, dongles, or adapters.

---

**Annotation**

Working on a piece of content or design files? Share the content and bring the team together to gather ideas, mark up changes, or iterate on your project.

**Stickies**

No more searching your phone for photos of easels and brainstorming notes. With digital stickies, you can create the perfect project plan and continue to ideate with the ability to easily move, add, and delete stickies. Every brainstorming session becomes evergreen, ever-inspirational.

**Web apps**

Save time by launching web apps directly from the home screen with the push of a button. Add your most commonly used applications like O365, Trello, or project management software with the option to share and annotate on the content during meetings.
Keep the ideas flowing with Webex

Transform the way you collaborate

Inspiration can happen anywhere, anytime, and outside of the four walls of the office. When ideas strike, you need the tools and technology to capture it, share it, and iterate on the idea.

With Webex you can create or open a whiteboard from a previous session whether that session was hosted on a Webex Desk Mini, Webex Desk, Webex Desk Pro, Webex Board, or the Webex App. Interact with the whiteboard to share your ideas as they come to you. As you work, your changes are saved automatically and your whiteboard is added to the list of whiteboards in the space. You can access the Webex App from your mobile device, tablet, or laptop—anytime, anywhere.

Watch the video 🎥
Secure and scalable

With Webex by Cisco you get end-to-end encryption. This means your data remains encrypted with a key that you own—from the moment any data leaves your machine up until it gets to the recipient’s device. You can put this key into your own data center and it remains totally secure within your control, managed and accessible by you. All messages, files, whiteboards, and actions are encrypted, whether in transit, at rest, and even in use. While other solutions offer things like “bring your own key” or “encryption at rest,” Webex is the only vendor that offers encryption end to end.

Cloud and on-premises registration for devices makes it affordable and easy to deploy in any space. And with Webex Control Hub, you can manage your devices and spaces with analytics to continually optimize your spaces.
Try it today

Take collaboration to the next level today with Webex and explore how Webex devices can power local and hybrid teams to get stuff done.
