Introducing the Front Runners

The research identified the top 33 percent of organizations who have comprehensive and robust remote working capabilities – The Front Runners.

The Front Runners outperform the rest of the mainstream by a wide margin across the three critical capabilities.

Are you prepared for Safe and Effective Remote Work?

Organizations need three critical capabilities to embrace Safe and Effective Remote work:

- 2x more likely to empower, trust, and value people
- 2.8x more likely to use agile teams that form and disband for activity-based work
- 3.1x more likely to use virtual cross-functional teams
- 2x more likely to have a strong focus on employee engagement and work/life balance
- 1.8x more likely to say that security and compliance are firmly on the senior management agenda
- 1.9x more likely to say that security and compliance tools are integrated into workflows
- 2.2x more likely to say that they have excellent business continuity plans
- 2x more likely to use video conferencing persuasively
- 2.8x more likely to adopt meeting recording and transcription
- 3.4x more likely to adopt virtual contact center
- 2.2x more likely to adopt real-time collaboration tools
- 2.4x more likely to adopt mobile business applications
- 2.7x more likely to support anywhere, any device access

Importance of employee enablement and support for flexible workstyles.

Security is paramount in remote working.

There is long-term value in embracing remote work. Front Runners who have adopted remote work best practices say that they have realized greater business outcomes in comparison to others.

Whether you are forced into remote work or were already moving into this direction and simply got nudged to accelerate due to the current environment, learn how you can achieve the results of Front Runners by comprehensively implementing safe and effective remote working.
