

## File sharing on the go.

Share files on the go with the Webex Team mobile app. Photos, videos and files can all be shared straight from your phone.

With the mobile apps, you can easily copy files from one space in Webex Teams to another without having to download it first like you do on the desktop apps. Even if you're sitting at your desk, you might want to pick up your mobile phone to save yourself some clicking when you need to share files in another space.

No matter where you are, sharing those important files and updates is at your fingertips.
