

Your data is always safe.

Webex Teams combines multiple levels of encryption security and customizable security features to ensure your data is safe - and keeps it that way, from your device to theirs and at every point in between.

- No matter how sensitive your work is, Webex Teams keeps your data secure, while keeping essential functions, like search, intact.
.....
- Your information can't be intercepted, you're always connected securely to the Cisco Webex Cloud.
.....
- Messages, documents, whiteboard drawings it's all secure. Even lost or stolen devices are no cause for concern. Enforced pin codes mean no one can get your data. And if necessary, your Webex Teams info can be completely wiped.
.....
- If you're working with people outside of your company, Webex Teams is still protecting you. Experts in your company have the visibility to see if you are unwittingly sharing sensitive and costly information, you shouldn't be.
.....
- Webex Teams automatically gives you the freedom to collaborate when, where and how you want to, with the peace of mind that your data will stay secure at all times.
