

Next-Gen study groups with Webex.

Study groups are a great way to share skill sets, improve note taking, and learn new ways to approach the subject matter. But it can be tough organizing a time and place to meet. Learn and study as a team. Get together no matter where you are with Webex.

1. Form your team:

Your teacher will help you form a Webex Space with the best mix of people to get the job done. Give your team a name!

2. Share:

Upload documents, files and images to help your group learn together. Everything gets stored in the Space, so you'll never lose it.

3. Notes:

You can even take notes together by typing your thoughts straight into the Space.

4. Make time to get together:

Schedule virtual meetings in your Space so you all have a set time and day to come together and study, even if you can't meet in person.

5. Raise your hand:

If you need some last-minute help, send a message to the group and ask if anyone is free for a chat, then hit the **Meet** button to start an instant video call to the group.

6. Find anything:

Need a reminder? Use search to find files and conversations quickly from keywords.

PRO TIP

Use @Mention to get the attention of the person you need, alerting them you have a question.

Studying together just got easier, with a team that has your back.
