

# Teamwork is an action, not a place with Webex.

Stay connected to your team from anywhere, including your home - with Cisco Webex. Video makes all the difference to working together on a project and maintaining that face-to-face feeling. Sharing ideas can still happen in an instant, and meeting with external stakeholders happens with the click of a button.

## Make it personal

Your personal meeting room (PMR) is like your virtual office, the door is always open for collaboration with your colleagues - join in the click of a button from your Webex desktop app. The address stays the same - making it easy for you to share the link with others.

## Call a team huddle

Need to get together quickly to review the latest proposal before your next customer meeting? Jump on a Webex call and share your screen for everyone to see. Annotate together from any device and get work done on the fly.

## Whiteboarding with Webex

Host a virtual brainstorming meeting with your team. Use a Webex whiteboard in the meeting to capture your creativity in one place. The best part - it's never erased. You can save the board and open it again after your meetings done.

## Share documents

Sharing files in project spaces keeps your content in context. Your spaces hold project documents alongside conversations - making catching up on progress a breeze.
