

# It's virtually done **with Webex.**

New to remote work? Help your team adjust to a virtual workplace. Keeping your team connected doesn't have to stop when you're spread across different cities. Webex Meetings allows secure, face-to-face collaboration with the flexibility to join anywhere, on any device.

## One button to push

The big green join icon makes joining a meeting one-click easy. Webex remembers your preferences and connects you in an instant, enabling you to switch between meetings in seconds.

## Share securely

Share only the content you intend to, confidently. By selecting a specific application, not your whole screen you can be sure you're keeping attention on the task at hand, not on distracting notifications that may pop up.

## Whiteboard a solution

Drawing ideas is a great way to illustrate a point. With virtual whiteboarding, brainstorming as a team doesn't have to stop when you're not in the room.

## Lead by example

Getting comfortable on video is a team activity. As a leader, the most powerful way to encourage video sharing is to turn on your own camera. Seeing facial reactions is critical to building trust and maintaining a healthy culture.

## No one misses a thing

Make it a habit to record your meetings. If someone's not able to attend your meeting, simply share the link, keeping everyone up to date.
