

Keep your team together **with Webex.**

If your team is new to remote work, bring them together with Cisco Webex Teams. Keep messages, status updates, and shared documents in one application. You can also start meetings on the fly to connect instantly on any device.

Form your team

Make a home for your team communications by creating a Team in Webex Teams and adding your people there. Within that team, create spaces to manage topics and projects. Being included in project spaces helps you stay up to date ad-hoc as your team works together.

Collaborate face-to-face

When meeting, encourage your team to use video. Seeing your team together makes all the difference to feeling close and connected - even miles apart.

Share documents

Sharing files in project spaces keeps your content in context. Your project spaces hold project documents right alongside conversations - making catching up on progress a breeze.

Let's get social

Create spaces for social interaction, like sharing family news, team member adventures or whatever becomes the topic of the day. Use GIFs and reactions to add some extra fun for your team.

Connect 1:1

Your team relies on you. Let them know they can always reach out using one-to-one chats or video calls, it's like a virtual open-door policy.
