

Webex Teams...

What's it all about?

With Cisco Webex Teams you can bring your project teams together to take an assignment from start to finish without ever leaving the app. Use a space for each project to share to store all the important files, documents, and conversations.

The powerful search allows you to find any piece of information previously shared.

Everything
you need in
one place.

Cisco Webex
Teams

Connect your team

Create spaces so your team can communicate quickly. Eliminate separate email streams. Connect everyone.

[How to create a space](#)

Access past knowledge

You can search keywords across all the spaces you're in. Filter by spaces, messages and files and when you find something relevant just click and you'll be taken straight to the content.

Sending messages

Work with your team across time zones with persistent chat. Eliminate formality when you need a quick question answered and respond from anywhere, anytime and any device.
