

Remove distance from decision making

It's easy to get the right people around the table with the Cisco Webex Room Panorama. You can connect boardrooms thousands of miles away and get the same experience you would if you were sitting across the same table. It's just like cutting your room in half and adding 5000 miles, it feels like the rooms are naturally connected by design.

Distance is no longer a barrier

Executives and partners can collaborate as if they were sitting face-to-face, even if distance used to be a barrier. You're still able to see facial cues from everyone around the table, whether in the room or on-screen.

Intuitive and intelligent meetings

Facial recognition and name labels helps take away any stress when putting a name to a face, keeping your conversation focused and on track.

Impressive design that doesn't distract

Your meeting room can be used for more than just video meetings. Feel confident inviting stakeholders to in-person meetings in the same room you use to connect outside of the office.

Webex Room Panorama delivers cutting edge, worldwide meeting capabilities to reduce needs to travel, saving you precious time.
