

Teamwork is an action, not a place with Webex.

Stay connected to your team from anywhere, including your home - with Cisco Webex. Video makes all the difference to working together on a project and maintaining that face-to-face feeling. Sharing ideas can still happen in an instant, and meeting with external stakeholders happens with the click of a button.

Make it personal

Your personal meeting room (PMR) is like your virtual office, the door is always open for collaboration with your colleagues - join in the click of a button from your Webex desktop app. The address stays the same - making it easy for you to share the link with others.

Call a team huddle

Need to get together quickly to review the latest proposal before your next customer meeting? Jump on a Webex call and share your screen for everyone to see. Annotate together from any device and get work done on the fly.

Whiteboarding with Webex

Host a virtual brainstorming meeting with your team. Use a Webex whiteboard in the meeting to capture your creativity in one place. The best part - it's never erased. You can save the board and open it again after your meetings done.

Share documents

Sharing files in project spaces keeps your content in context. Your spaces hold project documents alongside conversations - making catching up on progress a breeze.
