

Getting started with Branded Text

The brand info page

Before you get started

Our team simplifies the process of implementing company branding onto multiple wireless operators and device types. We also assist your team with registration, program authentication, and testing. This will ensure per-message verification, presented through a look and feel that matches your brand guidelines.

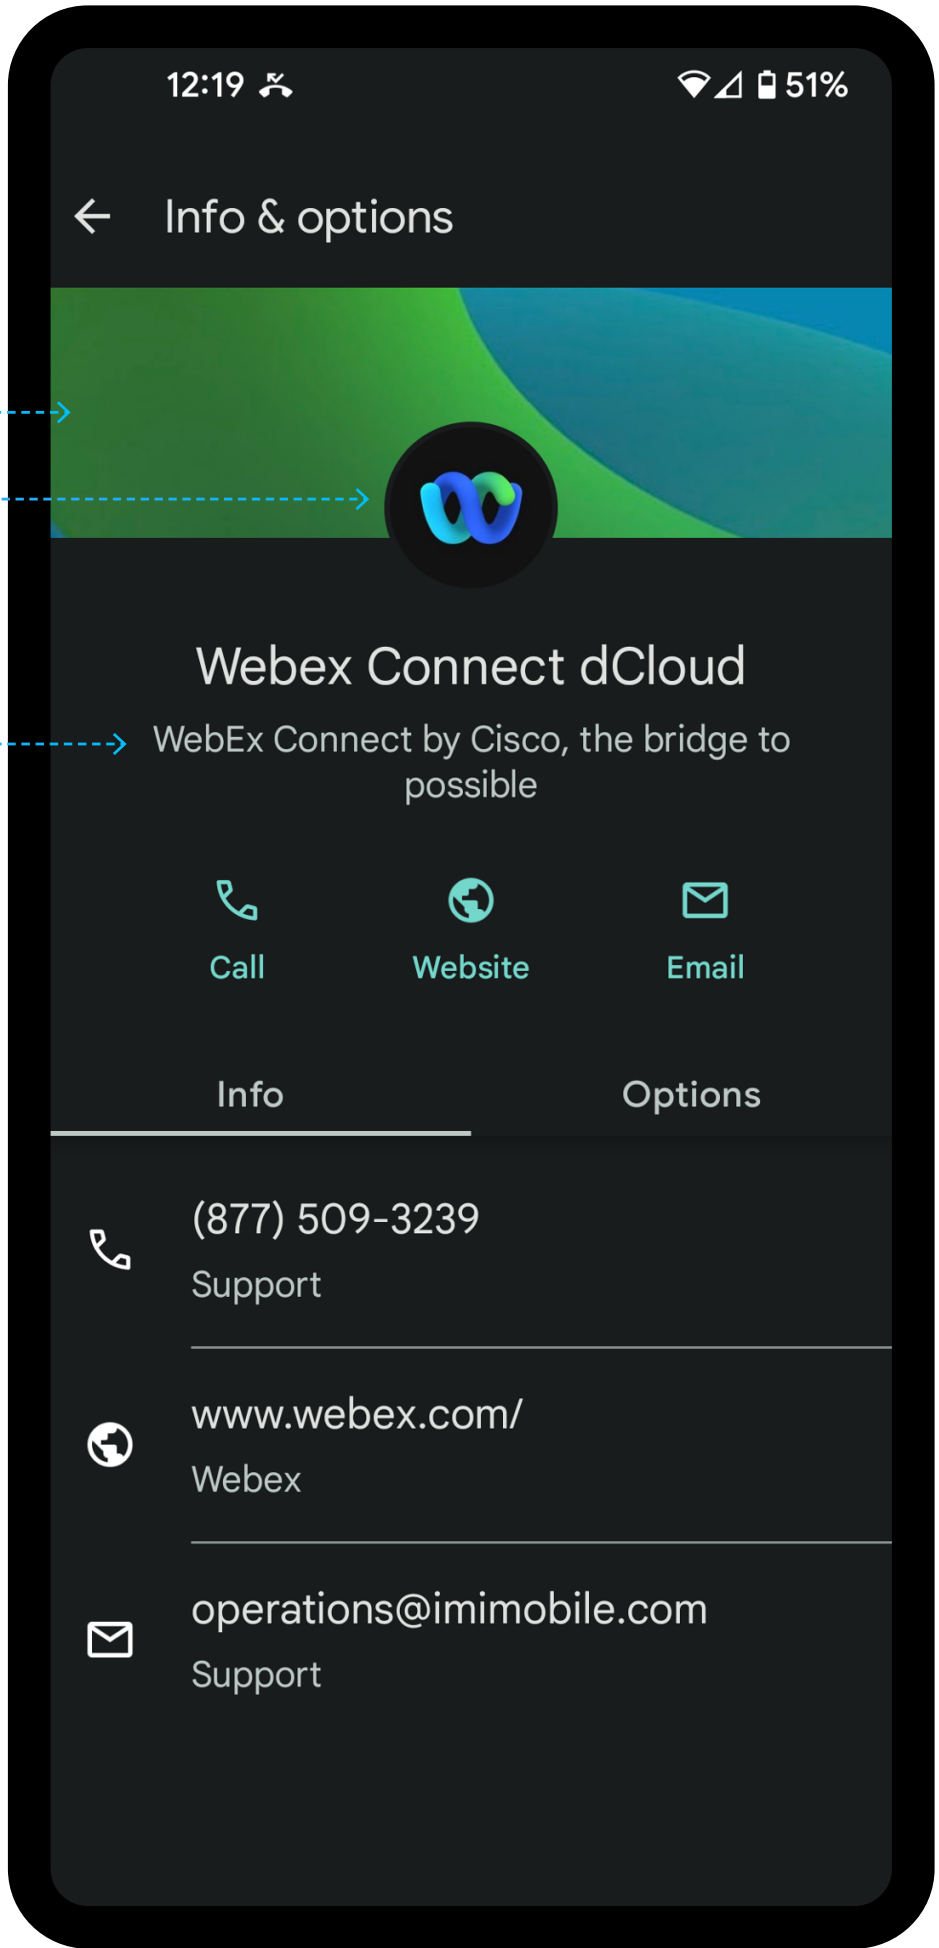

Features

A brand page is designed to personalize your contact details and contains elements that ensure your brand is well-represented. Features include:

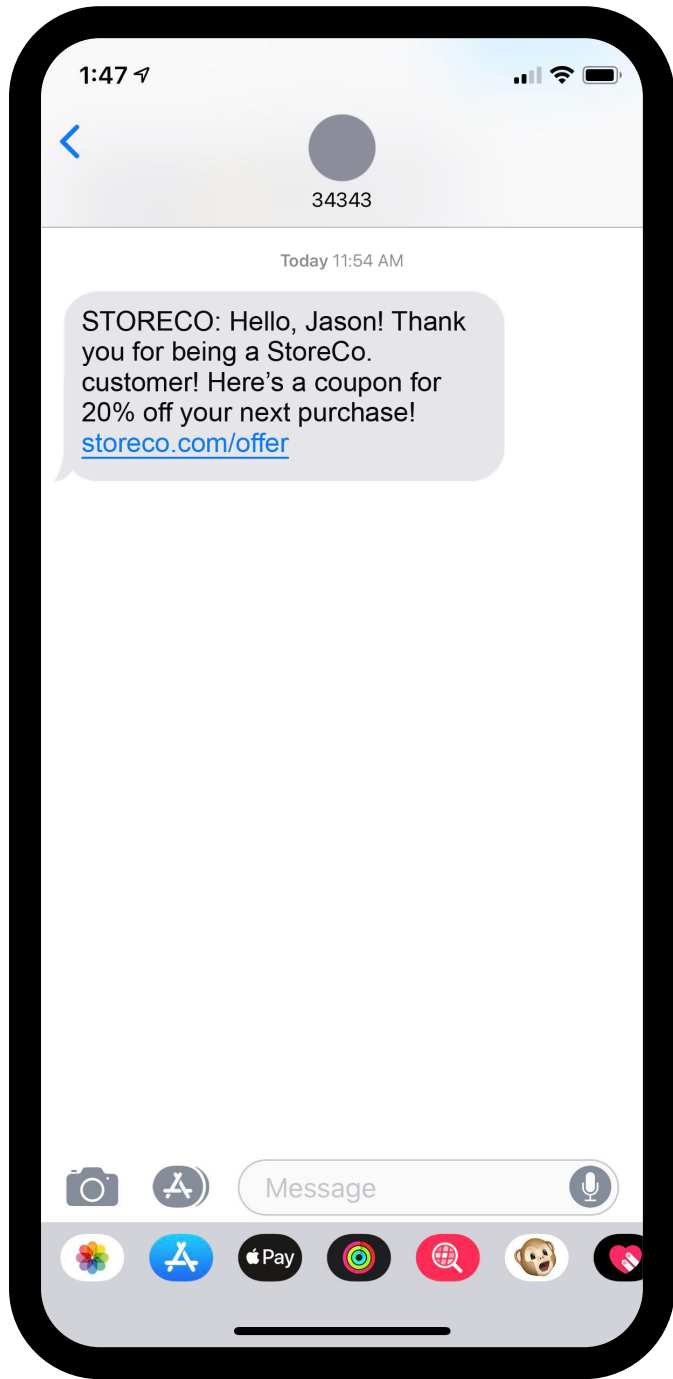

- Name
- Brand logo
- Chatbot description
- Contact information
- Privacy policy and terms links
- Header image
