

Cisco Room Kit Pro G2

Turn the large-room AV puzzle into high-impact spaces.

Cisco® Room Kit Pro G2 is the ultimate collaboration device solution designed to bring premium video conferencing into your high-impact spaces, including large conference rooms, multi-camera spaces, training rooms, boardrooms, auditoriums, and divisible room deployments.

Think beyond complex, multi-vendor conferencing hardware approaches, cable chaos, adapter jigsaw, and extensive custom programming with an AVoIP-first, premium AV integrator bundle designed for engaging, frictionless room experiences that are easy to deploy and maintain.

Featuring an NVIDIA-powered room engine, intelligent camera options, an intuitive touch controller, and a range of add-on room accessories, it provides simplicity and scalability to enable AI-powered meeting workflows, high-end AV over IP room orchestration, full-scale management, and extensive room integration to video-enable your most demanding spaces at scale.

Bring AI-powered video conferencing to any large room

MEETING ROOMS

BOARDROOMS

TRAINING ROOMS

AUDITORIUMS

DIVISIBLE SPACES

Enable premium video collaboration in your high-impact spaces

Advanced multi-camera tracking

Enable flexible camera placement or extend the field of view with dual-camera tracking, or enable inclusive views from the longest rooms with dual cross view

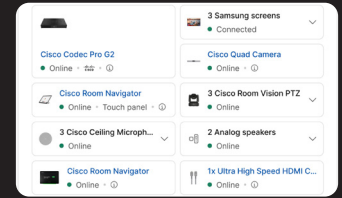

AV over IP convenience

Enable unparalleled PoE capacity to deploy and scale large-room experiences without extenders, adapters and cable clutter

A fully integrated experience

Combine the kit with Cisco cameras, mics, and other IP peripherals to enable the best cinematic meeting experience

Expert workspace management

Allows for unified cloud management in Control Hub to manage and remotely monitor your deployment without blind spots

AI-first, agentic large-room experiences

Reimagine your large workspaces with AI-enhanced meeting experiences and agentic collaboration workflows. Leveraging the NVIDIA-powered room engine for ultra-speed AI processing, you elevate your rooms with multi-camera intelligence, dynamic camera mode, enhanced AI noise removal, AI notetaker, audiovisual meeting zones, and agentic Workspace Advisor. And unleash intelligent AI framing, speaker tracking, presenter tracking, and advanced multi-camera scenarios with Cisco cameras out of the box to enable an inclusive experience for remote participants.

Optimized for meetings on any platform

Cisco Room Kit Pro G2 runs on an open platform with full-featured Webex, Microsoft Teams Rooms, and Zoom for Cisco Rooms, interoperability with Google Meet, and support for bring-your-own-device (BYOD) meetings via USB-C passthrough. In addition, it also supports the Microsoft Device Ecosystem Platform (MDEP) with enterprise-grade security, upgrades, and manageability when running Microsoft Teams Rooms.

Simplify your most demanding spaces

The solution provides unmatched Power over Ethernet (PoE) capacity to enable simplified, easy-to-scale AVoIP deployments, thus removing the need for external DSPs, complex adapters and cabling. Build your room over IP by leveraging Cisco cameras, mics, controllers, and other peripherals, and support your spaces as they evolve without the need for a complete redesign. Deploy advanced multi-camera switching, connect 5K input sources, integrate with large-format displays and audio systems, and install divisible rooms without relying on extensive custom programming and maintenance.

Unrivalled management & observability

Manage your entire room deployment without blind spots in Control Hub, offering a unified, cloud workspace admin experience. Your IT team remotely monitor video devices, room accessories including Ultra High Speed HDMI™ Cables by Cisco, Cisco network switches, and third-party peripherals--so that admins can understand what's going on in the room and simplify troubleshooting. And you can unlock full visibility of and optimize your room setup using the edge-AI-powered Workspace Advisor agent directly in Control Hub.
