ATL Tech Square Look Book

Designing the office for the Hybrid World

Sitting on the campus of Georgia Institute of Technology, ATL Tech Square is Cisco’s first Talent and Collaboration Center in the southeast region. Like other newly renovated Cisco offices in New York and Chicago, ATL Tech Square combines hyper-connectivity, cutting-edge green tech, and beautiful, vibrant design to completely upend assumptions about what an in-office experience can be.

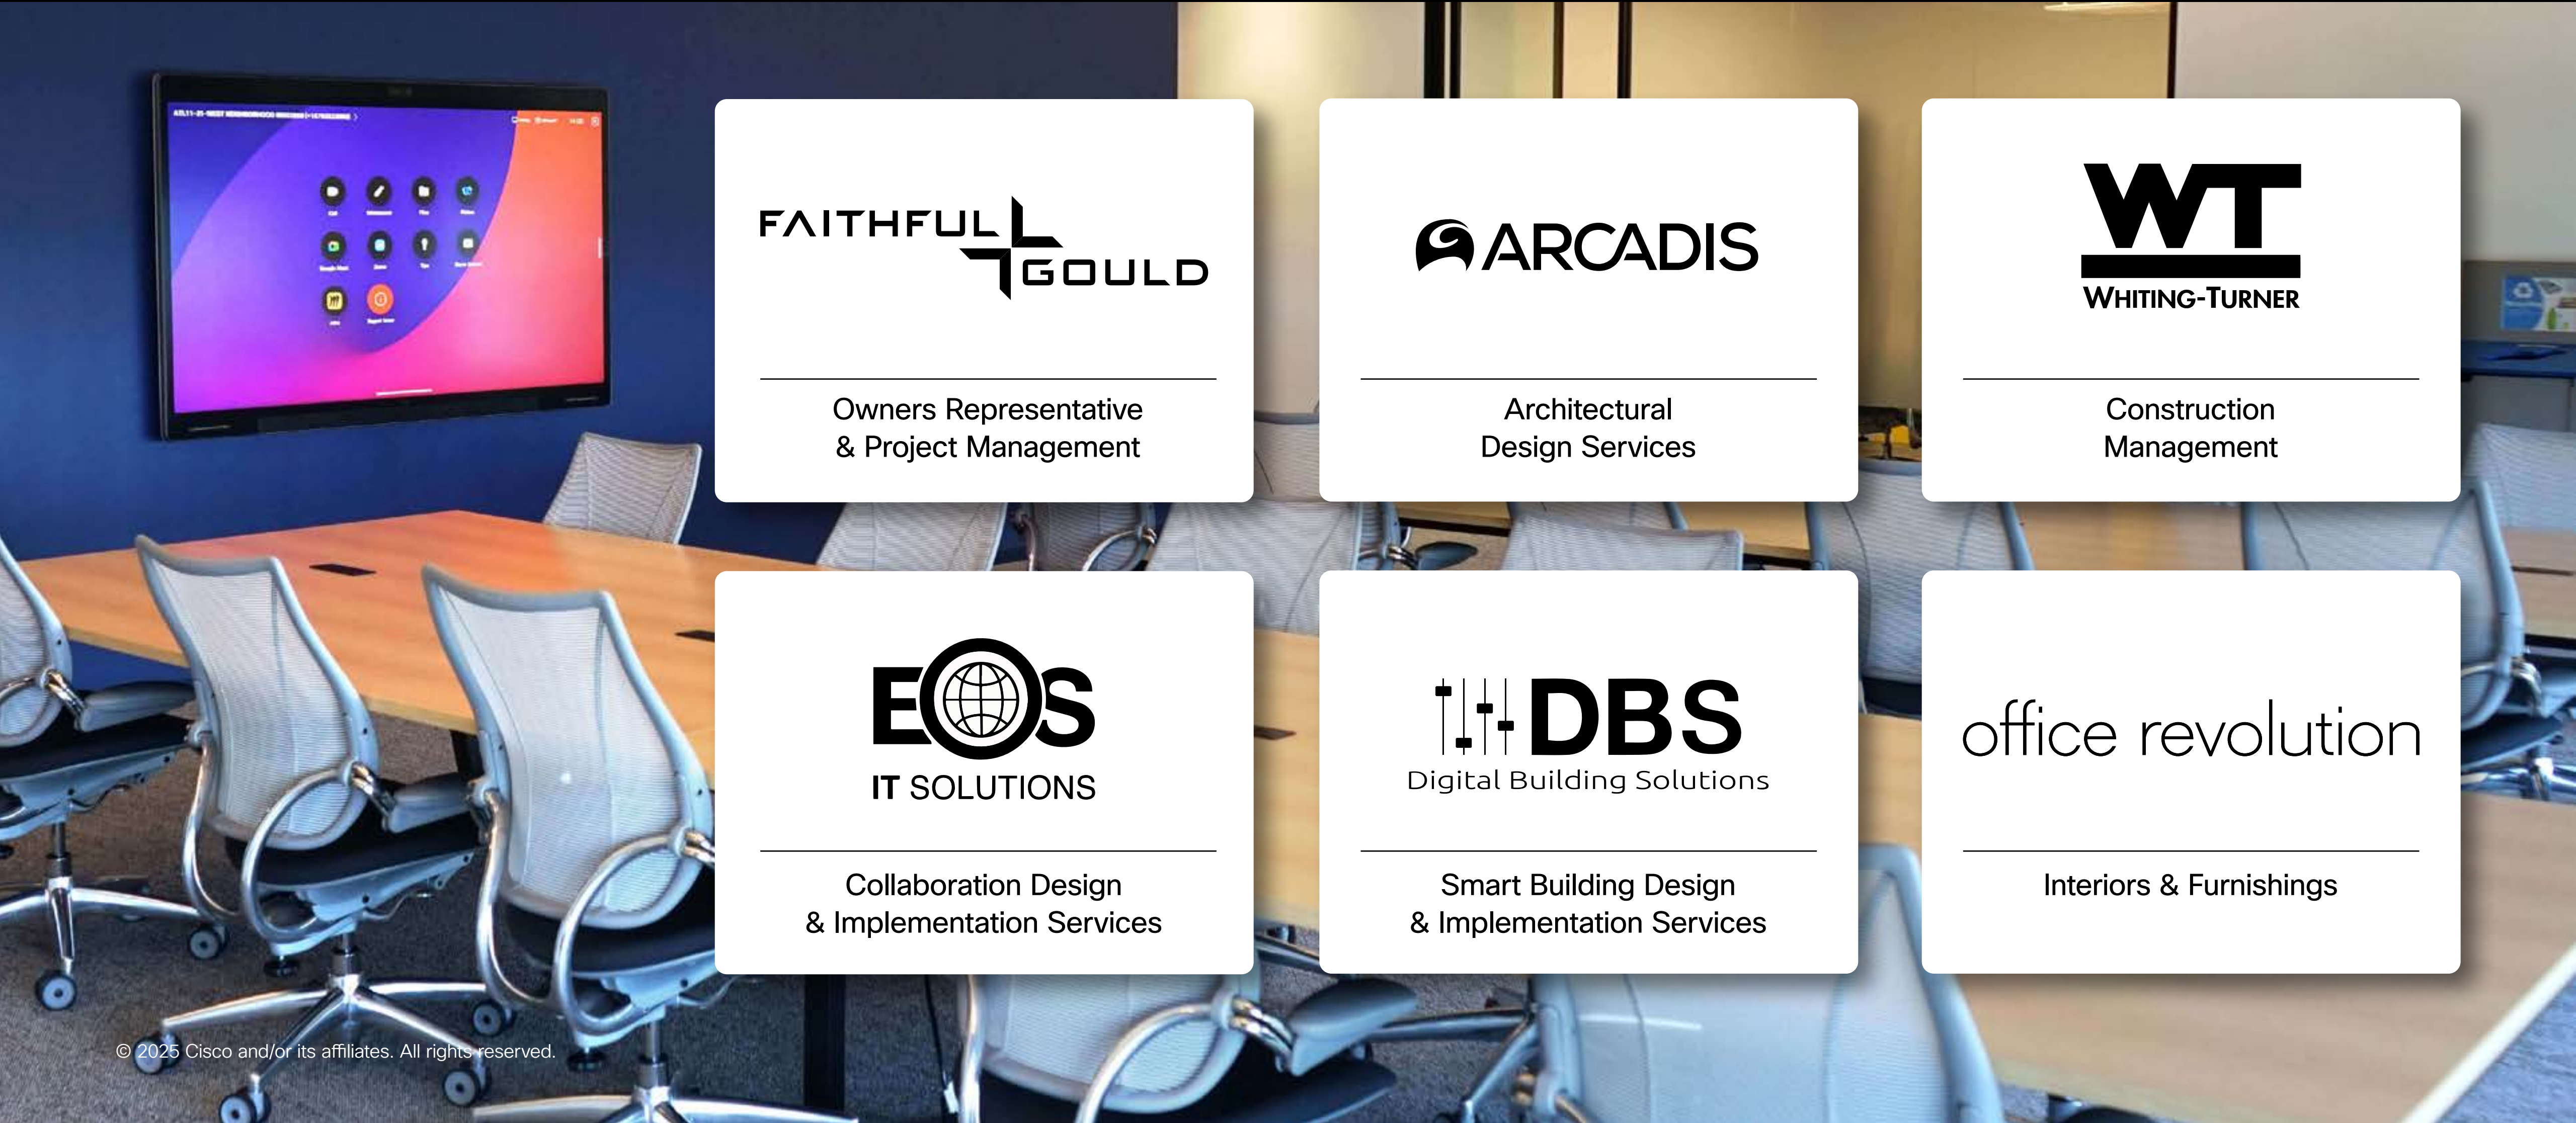

ATL Tech Square is one of the most connected, sustainable, and collaborative work environments Cisco has ever built. Phase 1, which encompasses 62,000 ft² (5,760 m²) of space is designed for employees, customers, and partners to collaborate, learn, and socialize. Phase 2 will include an additional 20,000 ft² (1,860 m²) of hybrid working space and a 10,000 ft² (930 m²) Innovation Center, which will include Cisco’s Networking Energy Center of Excellence.

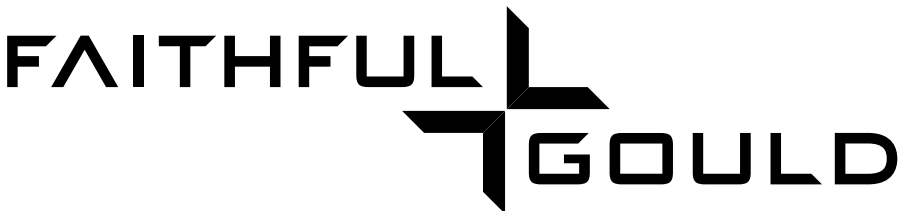

Built on a Power over Ethernet (PoE) foundation, 100% of the lighting, shading, environmental controls, and sit-stand desks are low voltage, contributing to Cisco’s sustainability (LEED) and health and wellness (WELL) goals.. When combined with other technology elements – such as Cisco Collaboration Devices, Cisco Catalyst WiFi Access Points, Meraki Cameras, and Cisco Smart Workspace, all connected by the Cisco Catalyst Network – ATL Tech Square is the next step in Cisco’s journey to digitize its real estate portfolio.

The intent of this document is to highlight the details, components and partners used in the creation of ATL Tech Square. Any reference herein to any specific commercial products or service does not necessarily constitute or imply its endorsement or recommendation.

Cisco Smart Workspaces

Workplace visualization tool, leveraging data sources across all technology platforms to help employees make better decisions within the work environment.

Enabling Technology

Networking Elements

The Cisco Catalyst 9400 Switch provides connectivity for IT elements (video devices, wireless APs, IP Phones, smart cameras, etc.).

The Cisco Catalyst 90 watt UPOE+ 9300 stackable switching platforms is used to connect and power OT/smart building components (lighting, shading, thermostats, sensors, etc.).

Cisco Catalyst 9300 Switch

Cisco Catalyst 9400 Switch

The Cisco Catalyst 6E-compliant Wireless Access Points (APs) provide secure network connectivity for employees and guests.

The Cisco Catalyst 9136 and 9166 APs also have built in air quality (VoC) sensors, providing additional data on environmental performance.

Cisco Catalyst 9130AX Access Points

Enabling Technology

Cisco Video Devices

Cisco Room Bar

Integrated video conferencing system for small rooms

Cisco Room Bar Pro

Dual-camera integrated video conferencing system for medium rooms

Cisco Room Kit EQ

An AI-powered collaboration solution for large collaboration rooms and boardrooms

Cisco Room Kit Pro

A powerful and flexible room device bundle for very large rooms and custom AV integration scenarios.

Cisco Board Pro G2

Interactive collaboration board available in 55" and 75" screen sizes

Cisco Room Kit EQX

Powerful dual-screen collaboration system with integrated sound system

Cisco Desk Pro

Studio-quality desktop collaboration with a 27" screen, used in Quiet Rooms

Cisco Desk

All-in-one desktop collaboration device with a 24" screen, used on hot desks

Cisco Desk Mini

Desktop collaboration system with a 15" screen, used in video booth and banquettes

Cisco Ceiling Microphone Pro

Intelligent beam-forming mic, easy-to-deploy and gives great room coverage

Cisco Table Microphone Pro

Advanced beamforming table microphones.

Cisco Room Vision PTZ

Premium pan-tilt-zoom

Enabling Technology

Room Signage

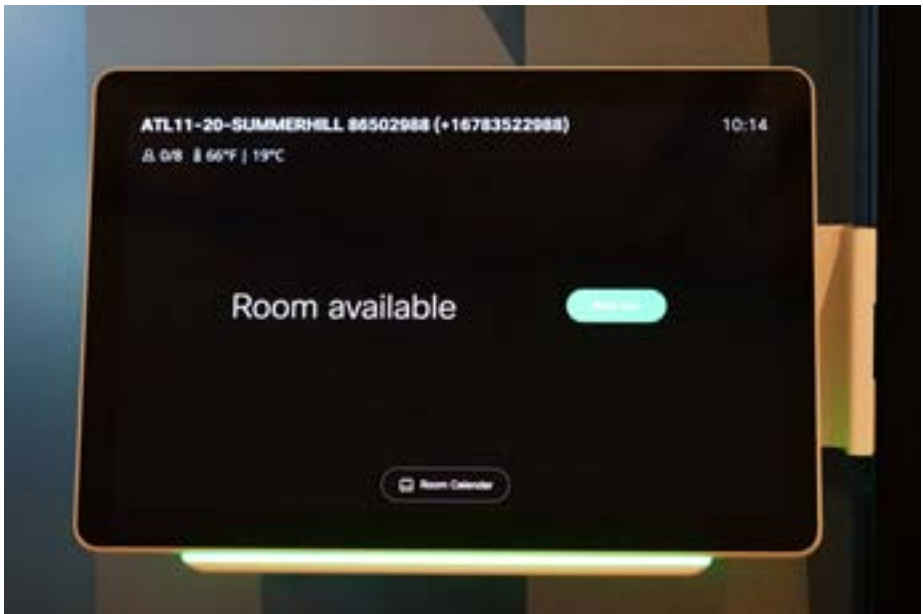

Cisco Room Navigator for Wall

Bookable Rooms

Cisco Room Navigator for Wall – through its integration with O365, Exchange and Google Calendar – enables seamless room booking, calendar view, meeting information, and meeting extension with a few taps on the touch screen.

Adhoc Rooms

The Cisco Room Navigator for Wall uses an in-house developed web app to change the display and LED light based on occupancy, green available, and red for occupied.

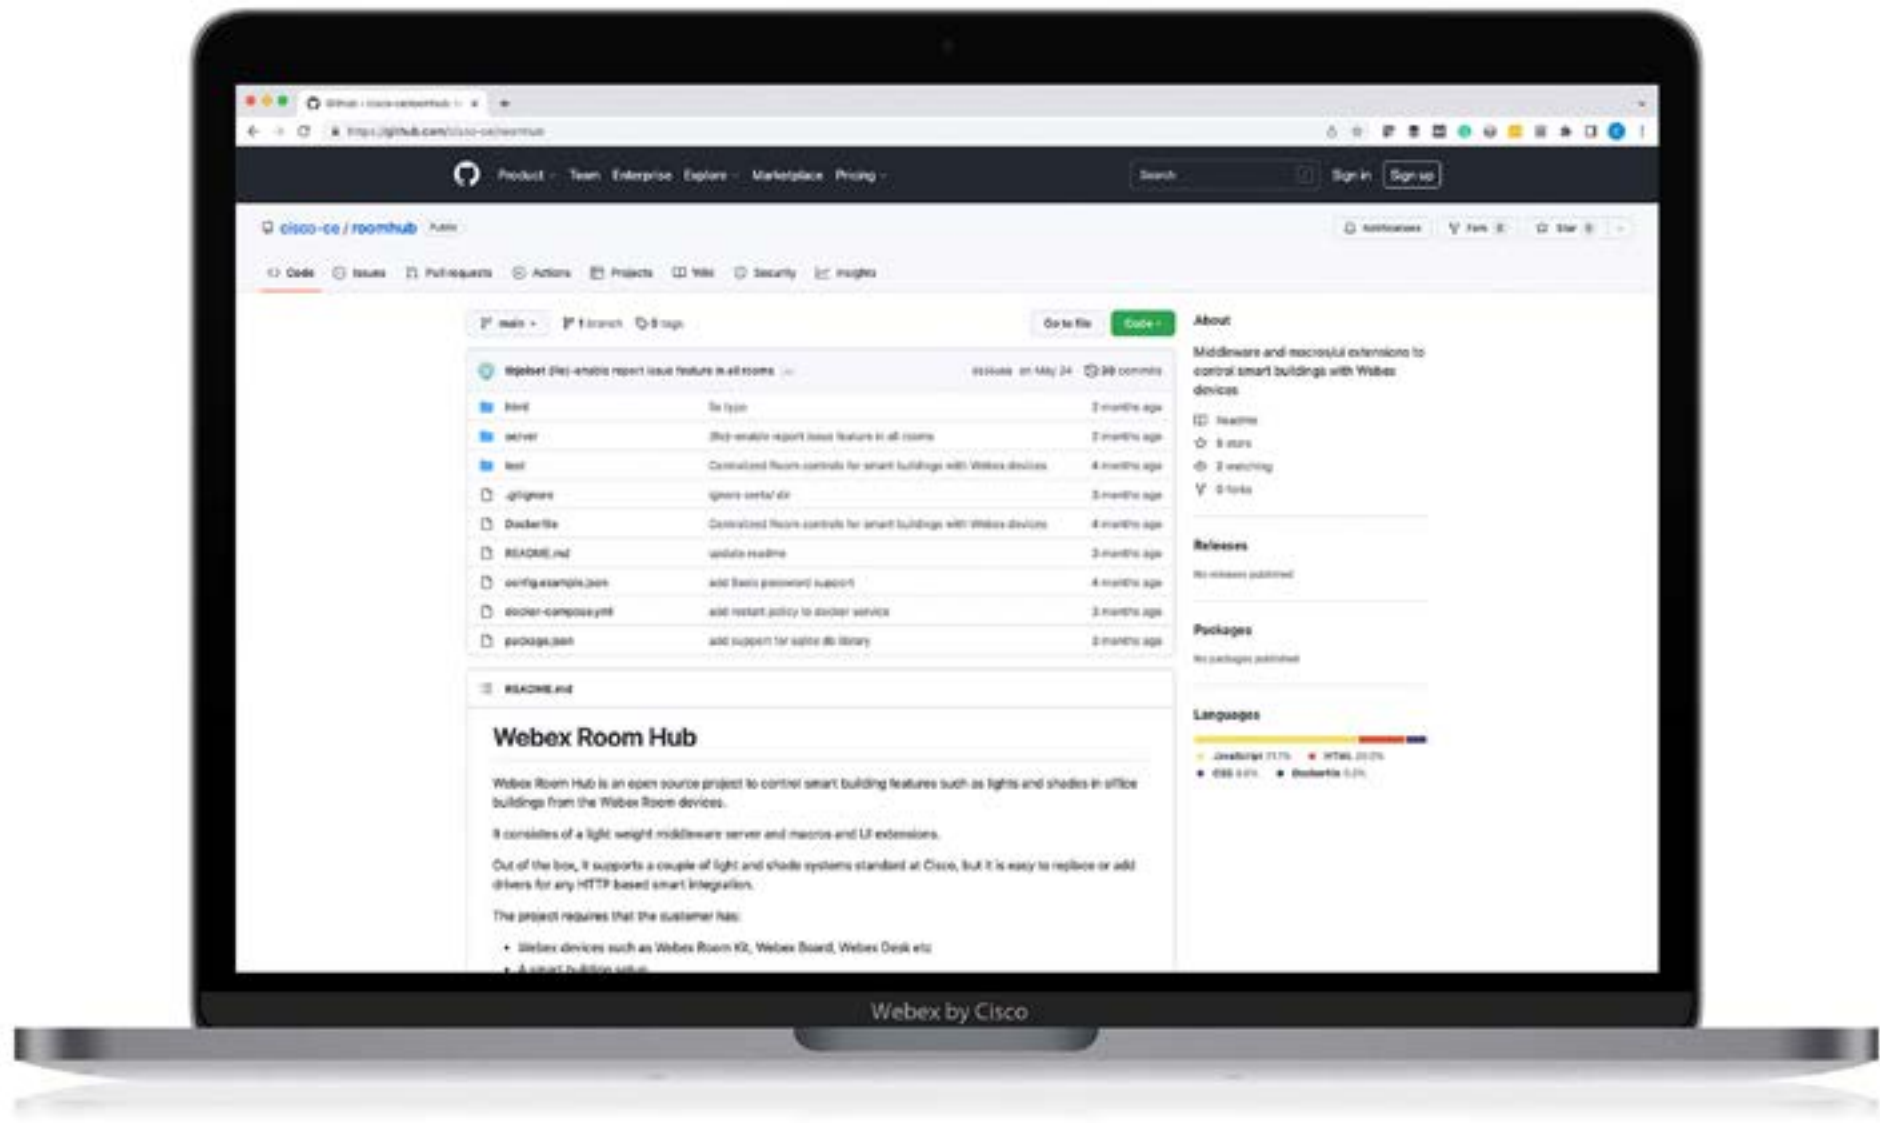

Enabling Technology

Building System Integration

Leveraging the open APIs available from the smart building systems and the UI Extension feature within the Cisco collaboration devices, custom buttons have been installed on the Cisco Board Pros, Cisco Desk/Desk Pros, and the Cisco Room Navigator to control lights and shades in the collaboration spaces.

These smart building controls are also available via voice command in selected rooms using Webex Assistant (“Hey Webex, lower the shades,” ”Hey Webex, turn off the lights,” etc.). The integrations leverage the openness of the smart building APIs and the Cisco collaboration devices, and do not require using any third-party control systems (Crestron, AMX, etc.). They are now available on GitHub for download and use.

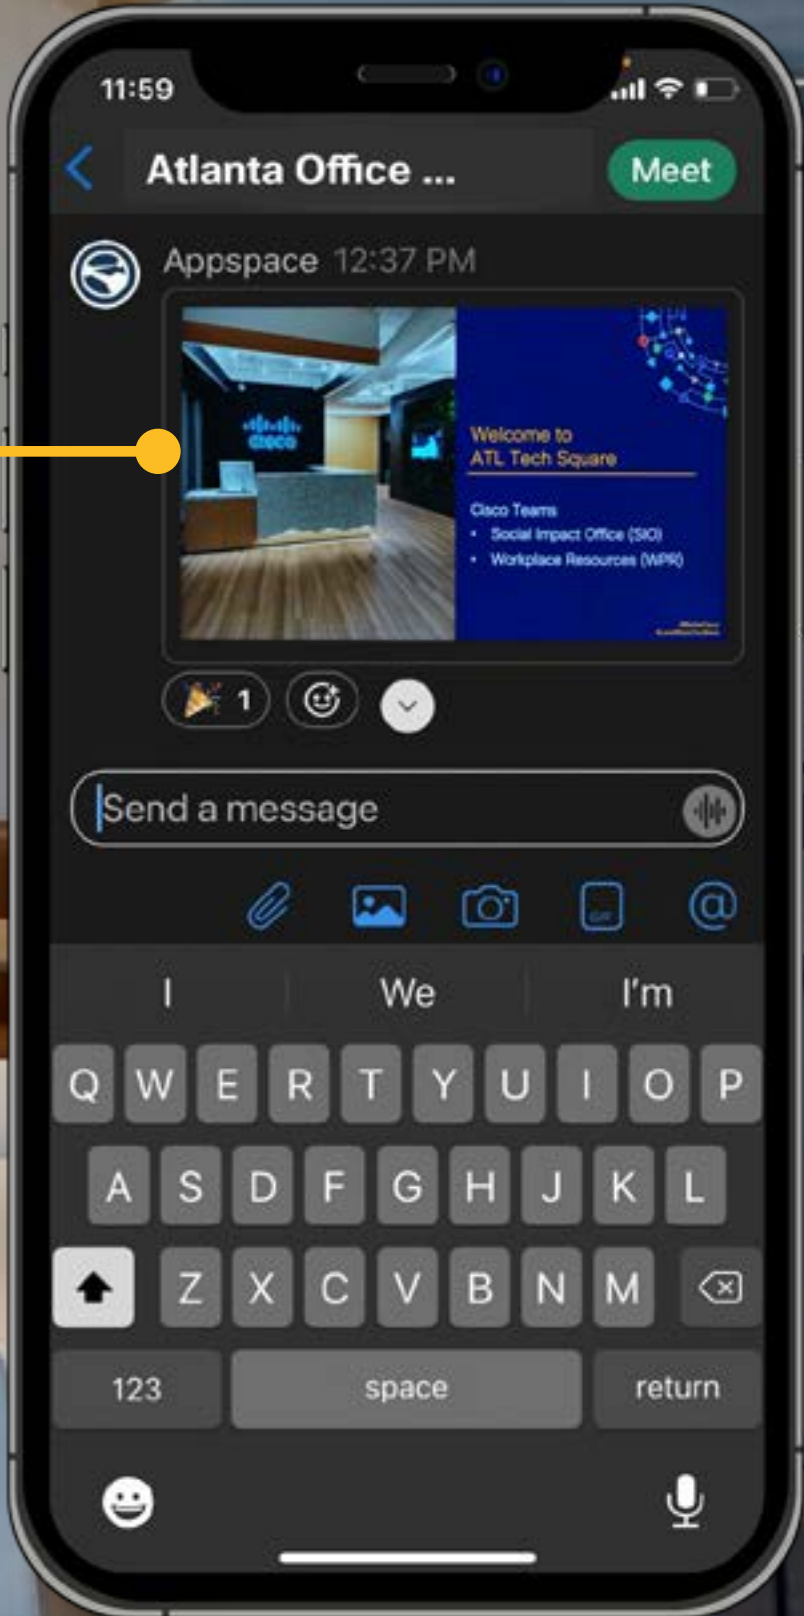

Enabling Technology

Digital Signage

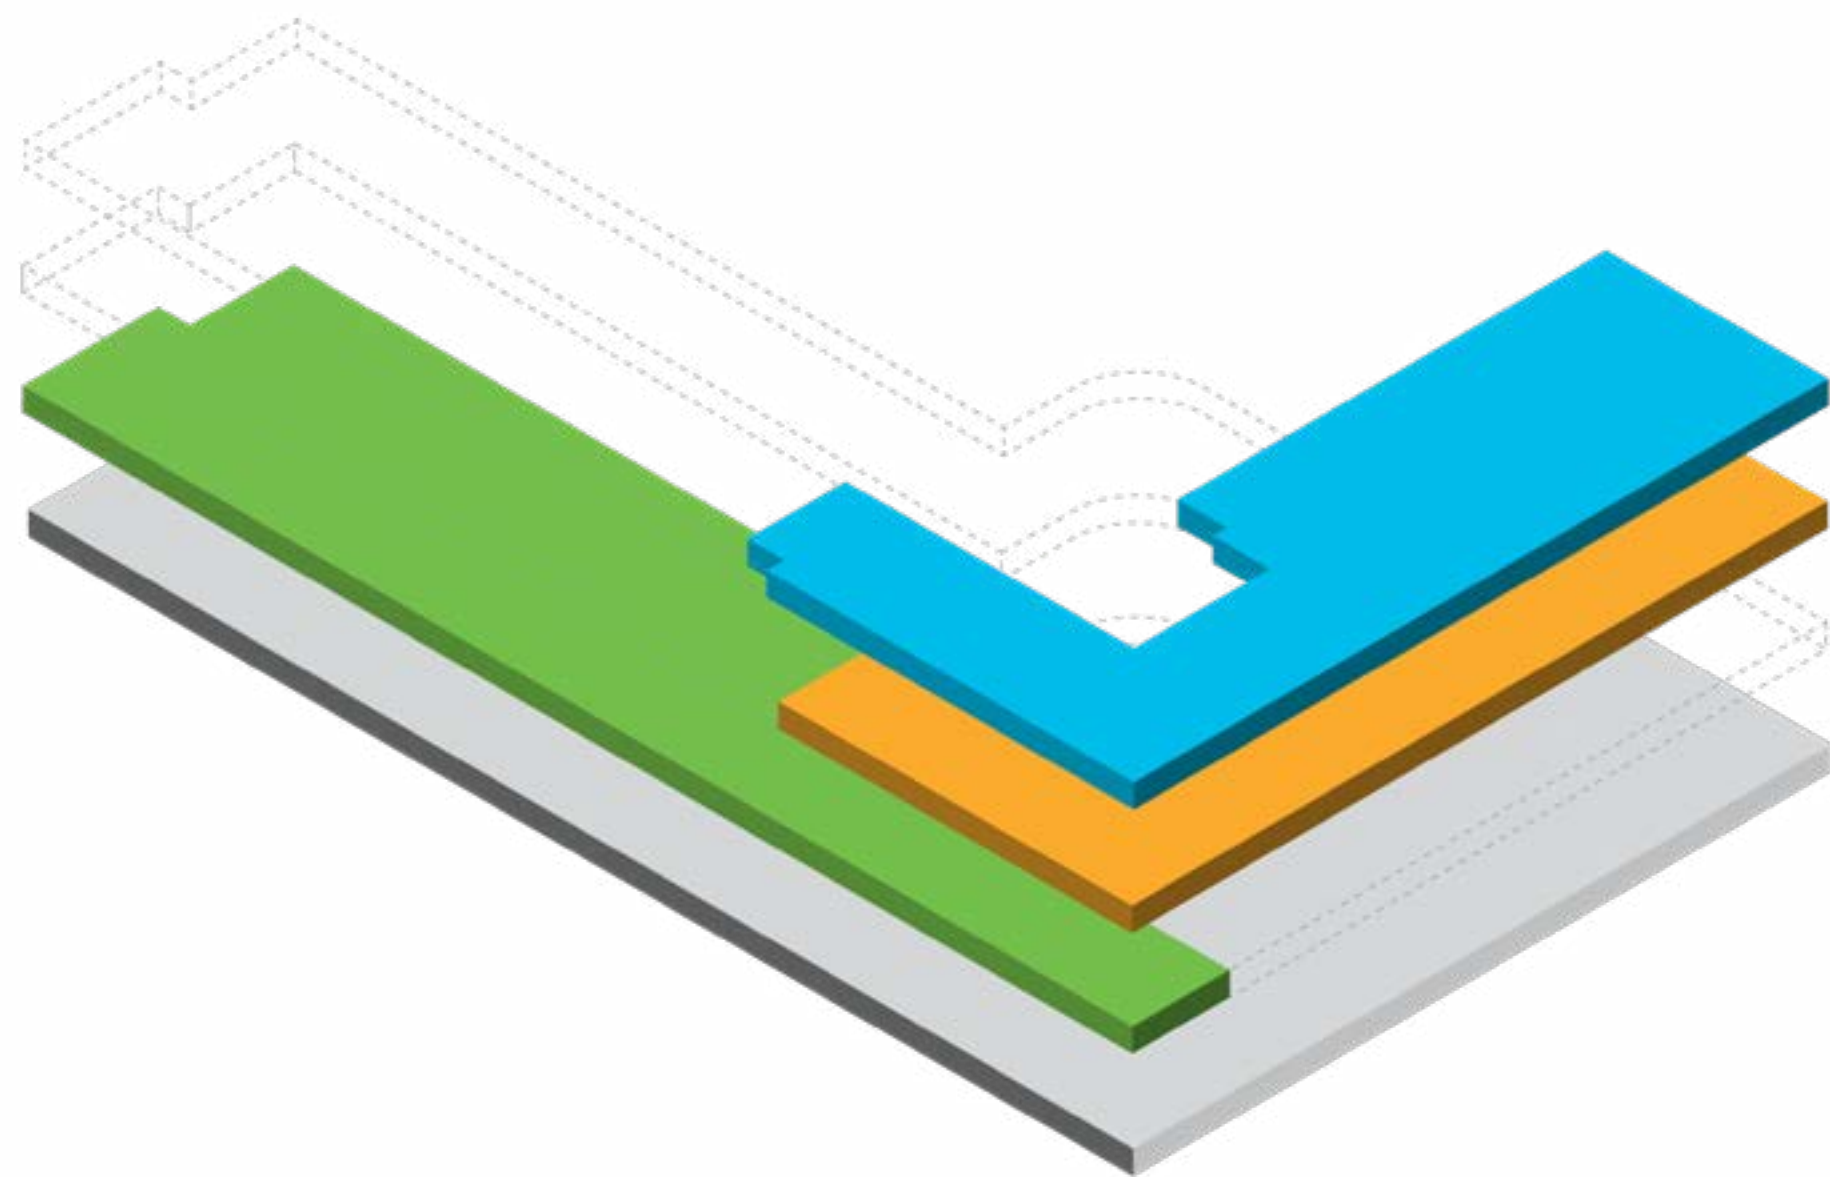

Appspace Digital Signage on Samsung 85” display

Simultaneous display of local office signage within the Webex app, via Appspace bot.

Hot Desk

Overview

Providing areas for people to do focus work or passively participate in a remote meeting is critical in the hybrid work environment, and the hot desk is the ideal space for these activities.

In ATL Tech Square, the hot desks are 100% low voltage and powered by the network. This includes powering the height adjustable motor, task light, USB-A and USB-C convenience outlets for laptop and mobile device charging, as well as the Cisco Desk device.

With a simple scan of the QR code, employees can sign in and book the desk for a few hours or for the rest of the day. Hot desking turns the Webex Desk into the employee's personal meeting device, enabling meeting notifications, One Button to Push, and whiteboarding. The device can also be used as a secondary display.

Traditional Huddle Room

Overview

Making it easy for small groups to come together to share information, brainstorm, and solve problems is absolutely critical. In ATL Tech Square, we've replaced personal offices with dozens of huddle rooms and smaller collaboration spaces, each designed for this exact purpose. All of these spaces are video-enabled, ensuring the right resources can come together, regardless of where they are.

The Traditional Huddle Room is a superb space for small group collaboration, especially when you need to bring in that important remote participant. Wireless sharing allows you to display content effortlessly in local and virtual meetings.

Casual Huddle Room

Overview

The Casual Huddle is specifically designed for that informal meeting with colleagues, even when some of those colleagues are remote.

The soft seat is lightweight and highly flexible, allowing the space to adapt to any and all needs. The space can be deployed as an enclosed room as well as in the open plan. In addition, there are two technology options: a Cisco Room Bar for a video-centric experience or a Cisco Board Pro if co-creation is required..

Features

- Cisco Room Bar with a single 55" display (LG, Panasonic, Samsung, or Sony) or Cisco Board Pro 55 on a Salamander EZ Touch Wall Mount

Brainstorming Huddle Room

Overview

A perfect space for an ad-hoc brainstorming session or when you want to co-create with a colleague on an important project.

In ATL Tech Square, there are two options for this workspace – bar and standard height. When paired with a bar height table, the Cisco Board Pro 55 is attached to the fully supported wall using the Cisco Board Pro wall mounting kit. When standard height furniture is used, the optimal configuration includes an adjustable height mount, allowing the device to be used both in a standing and seated position.

Features

- Cisco Board Pro 55, fixed wall mount (bar height) or Salamander EZ touch Wall mount (standard height)
- Boss Ola Chair (Standard Height) or Boss Ola Stool (Bar Height)
- Salamander EZ Touch Wall Mount (Standard Height) or Fixed Wall Mount (Bar Height)

Small Brainstorming – Open Plan

Overview

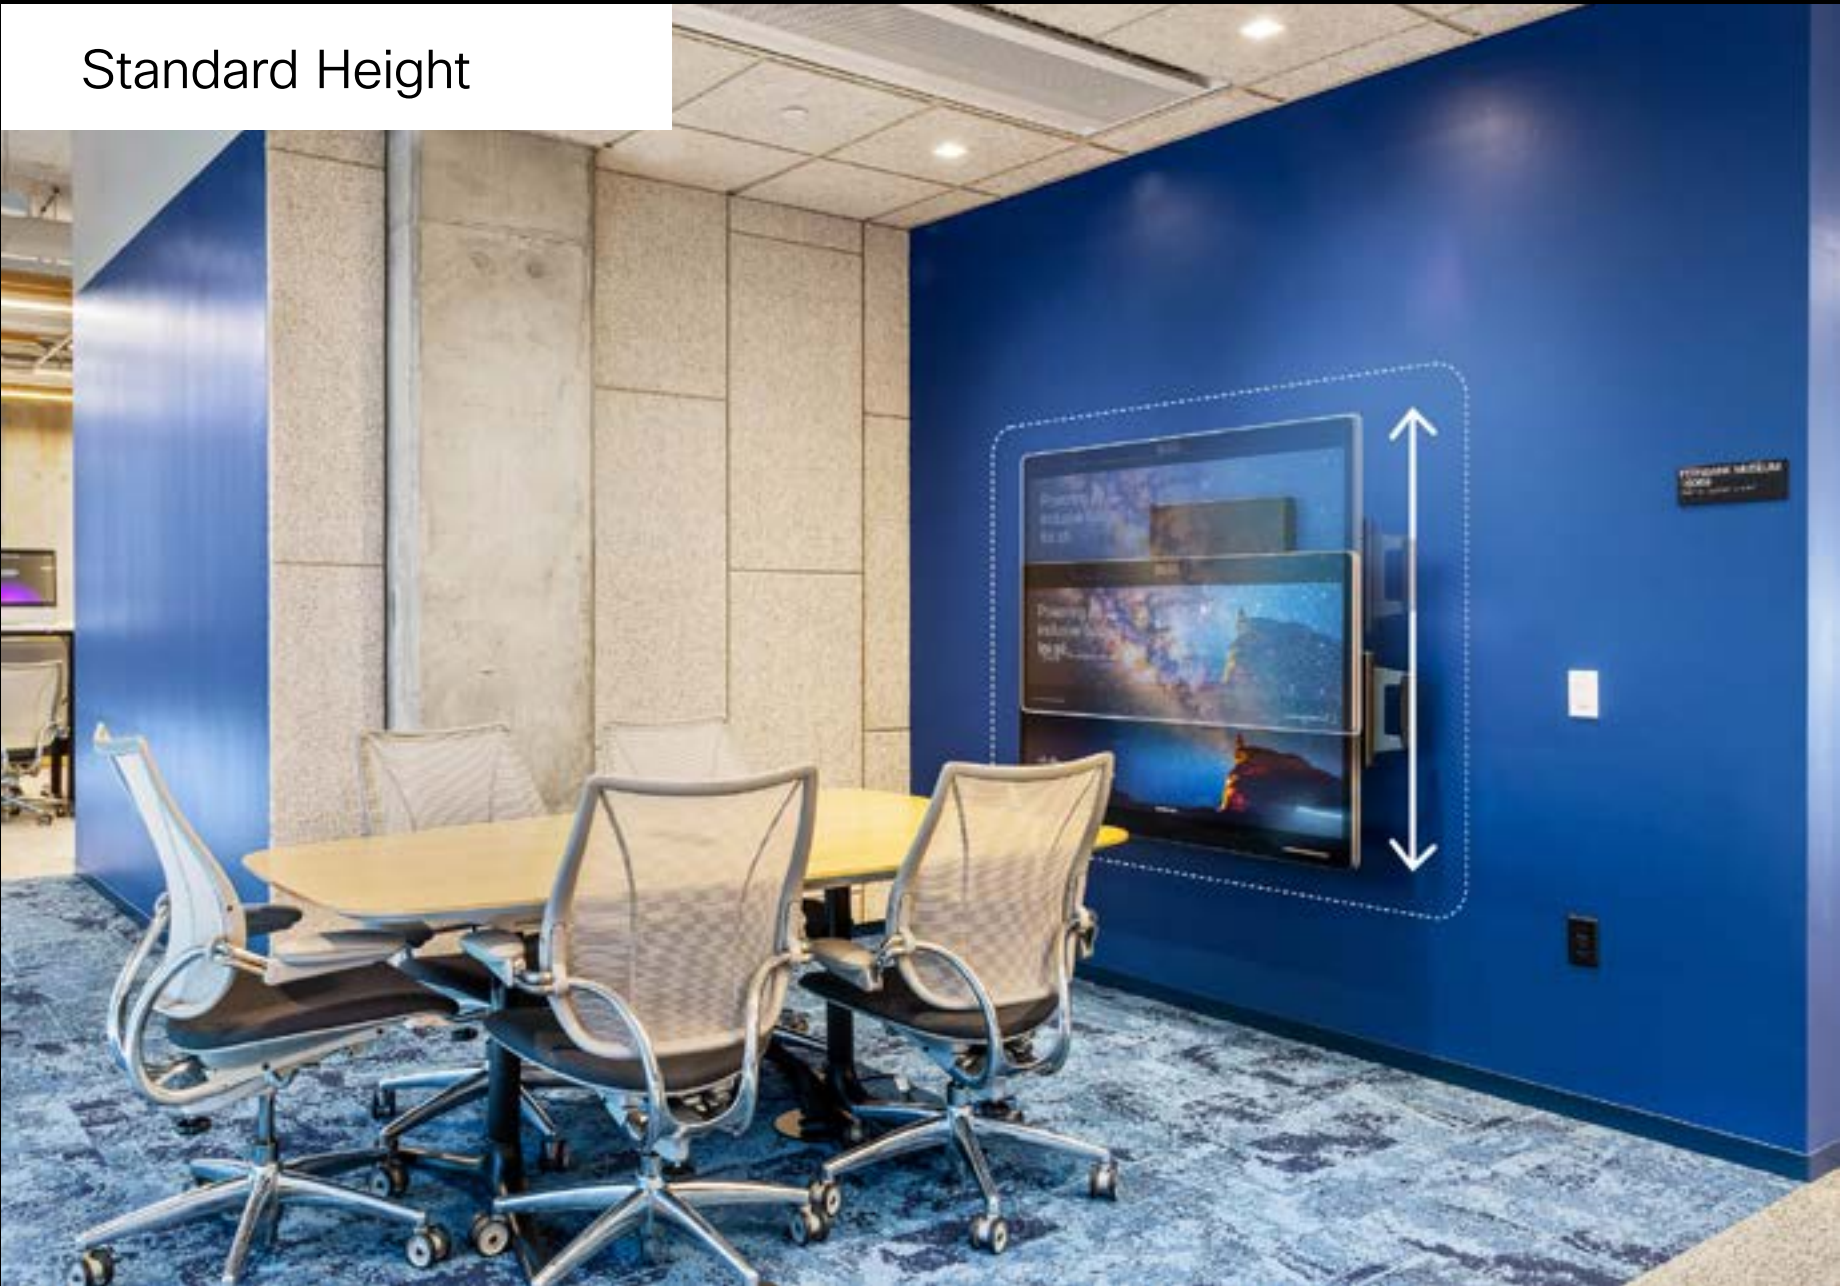

In the hybrid workplace, collaboration needs to be omnipresent, and with that, there needs to be a focus on creating “spaces” (wall rooms) as well as “places” (open areas) for people to work together. In ATL Tech Square, over 20% of the video-enabled collaboration areas can be found in the open plan. Not all collaboration is scheduled – creating opportunities for serendipitous connections is a critical part of Cisco’s strategy to enable hybrid work.

These small brainstorming spaces are enabled with Cisco Board Pro 55, supporting video calling, content sharing, and co-creation/whiteboarding. As with other Cisco Board Pro-enabled rooms, adjustable mounts can be used to allow for the height of the device to be changed when needed. Directional speakers are also used in some cases when co-located in focused work areas to minimize noise leakage.

Features

- Cisco Board Pro 55 mounted using a Cisco Wall mounting kit
- Renkus-Heinz Directivity Control Series speakers (optional)

Large Collaboration Room

Overview

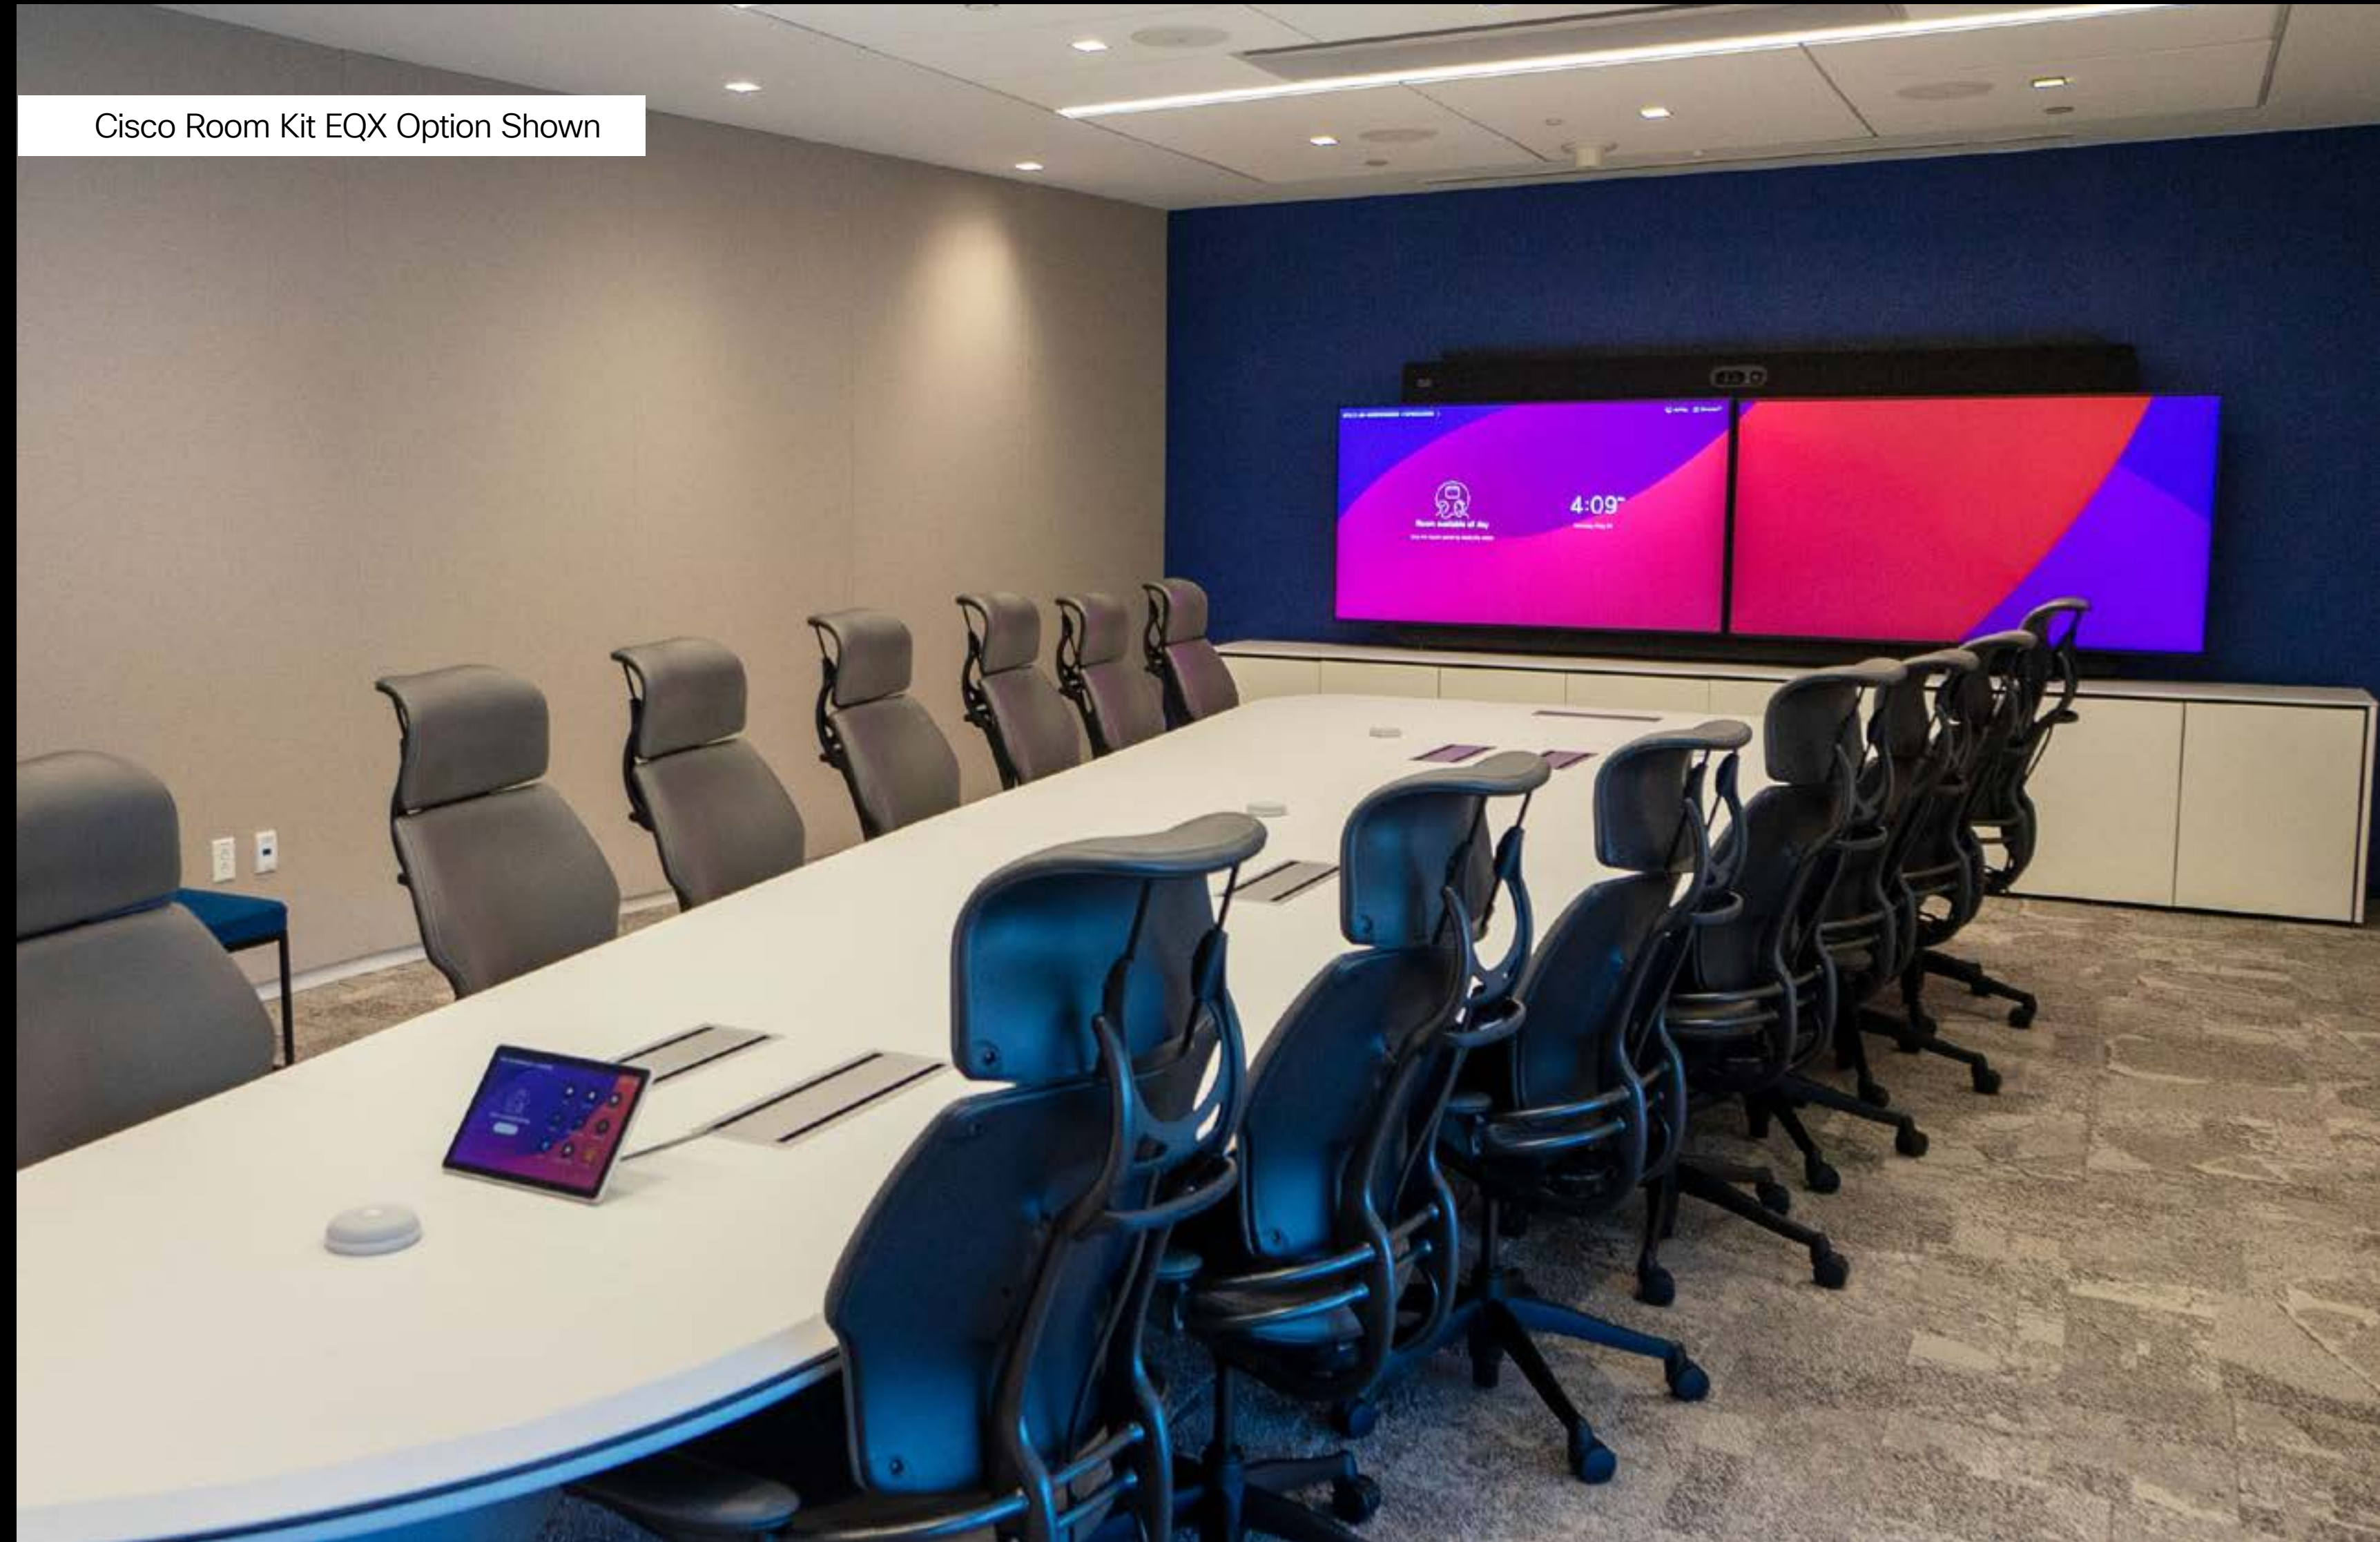

A collaboration space specifically designed for large groups, dual screens allow in-person attendees to see both remote participants and content, and the tapered table shape ensure remote participants can see everyone in the room. The rear-mounted Cisco PTZ 4K Camera automatically captures presenters as they move in the front of the room. The optional Cisco Board Pro, operating in companion mode, allows co-creation capabilities to be brought into a video meeting.

Features

- Cisco Room Kit EQX or Cisco Room Kit EQ with 75" displays (LG, Panasonic, Samsung, or Sony)
- Cisco Ceiling Microphones or Cisco Table Microphone Pro
- Rear-mounted Cisco PTZ 4K Camera
- Third-party 6.5" ceiling speakers & amplifier (for Room Kit EQ option only)
- Wall Mounted Cisco Board Pro 75
- Salamander Infiniti or Nienkamper Vox Conference Table
- Humanscale Freedom Task Chairs with headrests

Seminar Overview

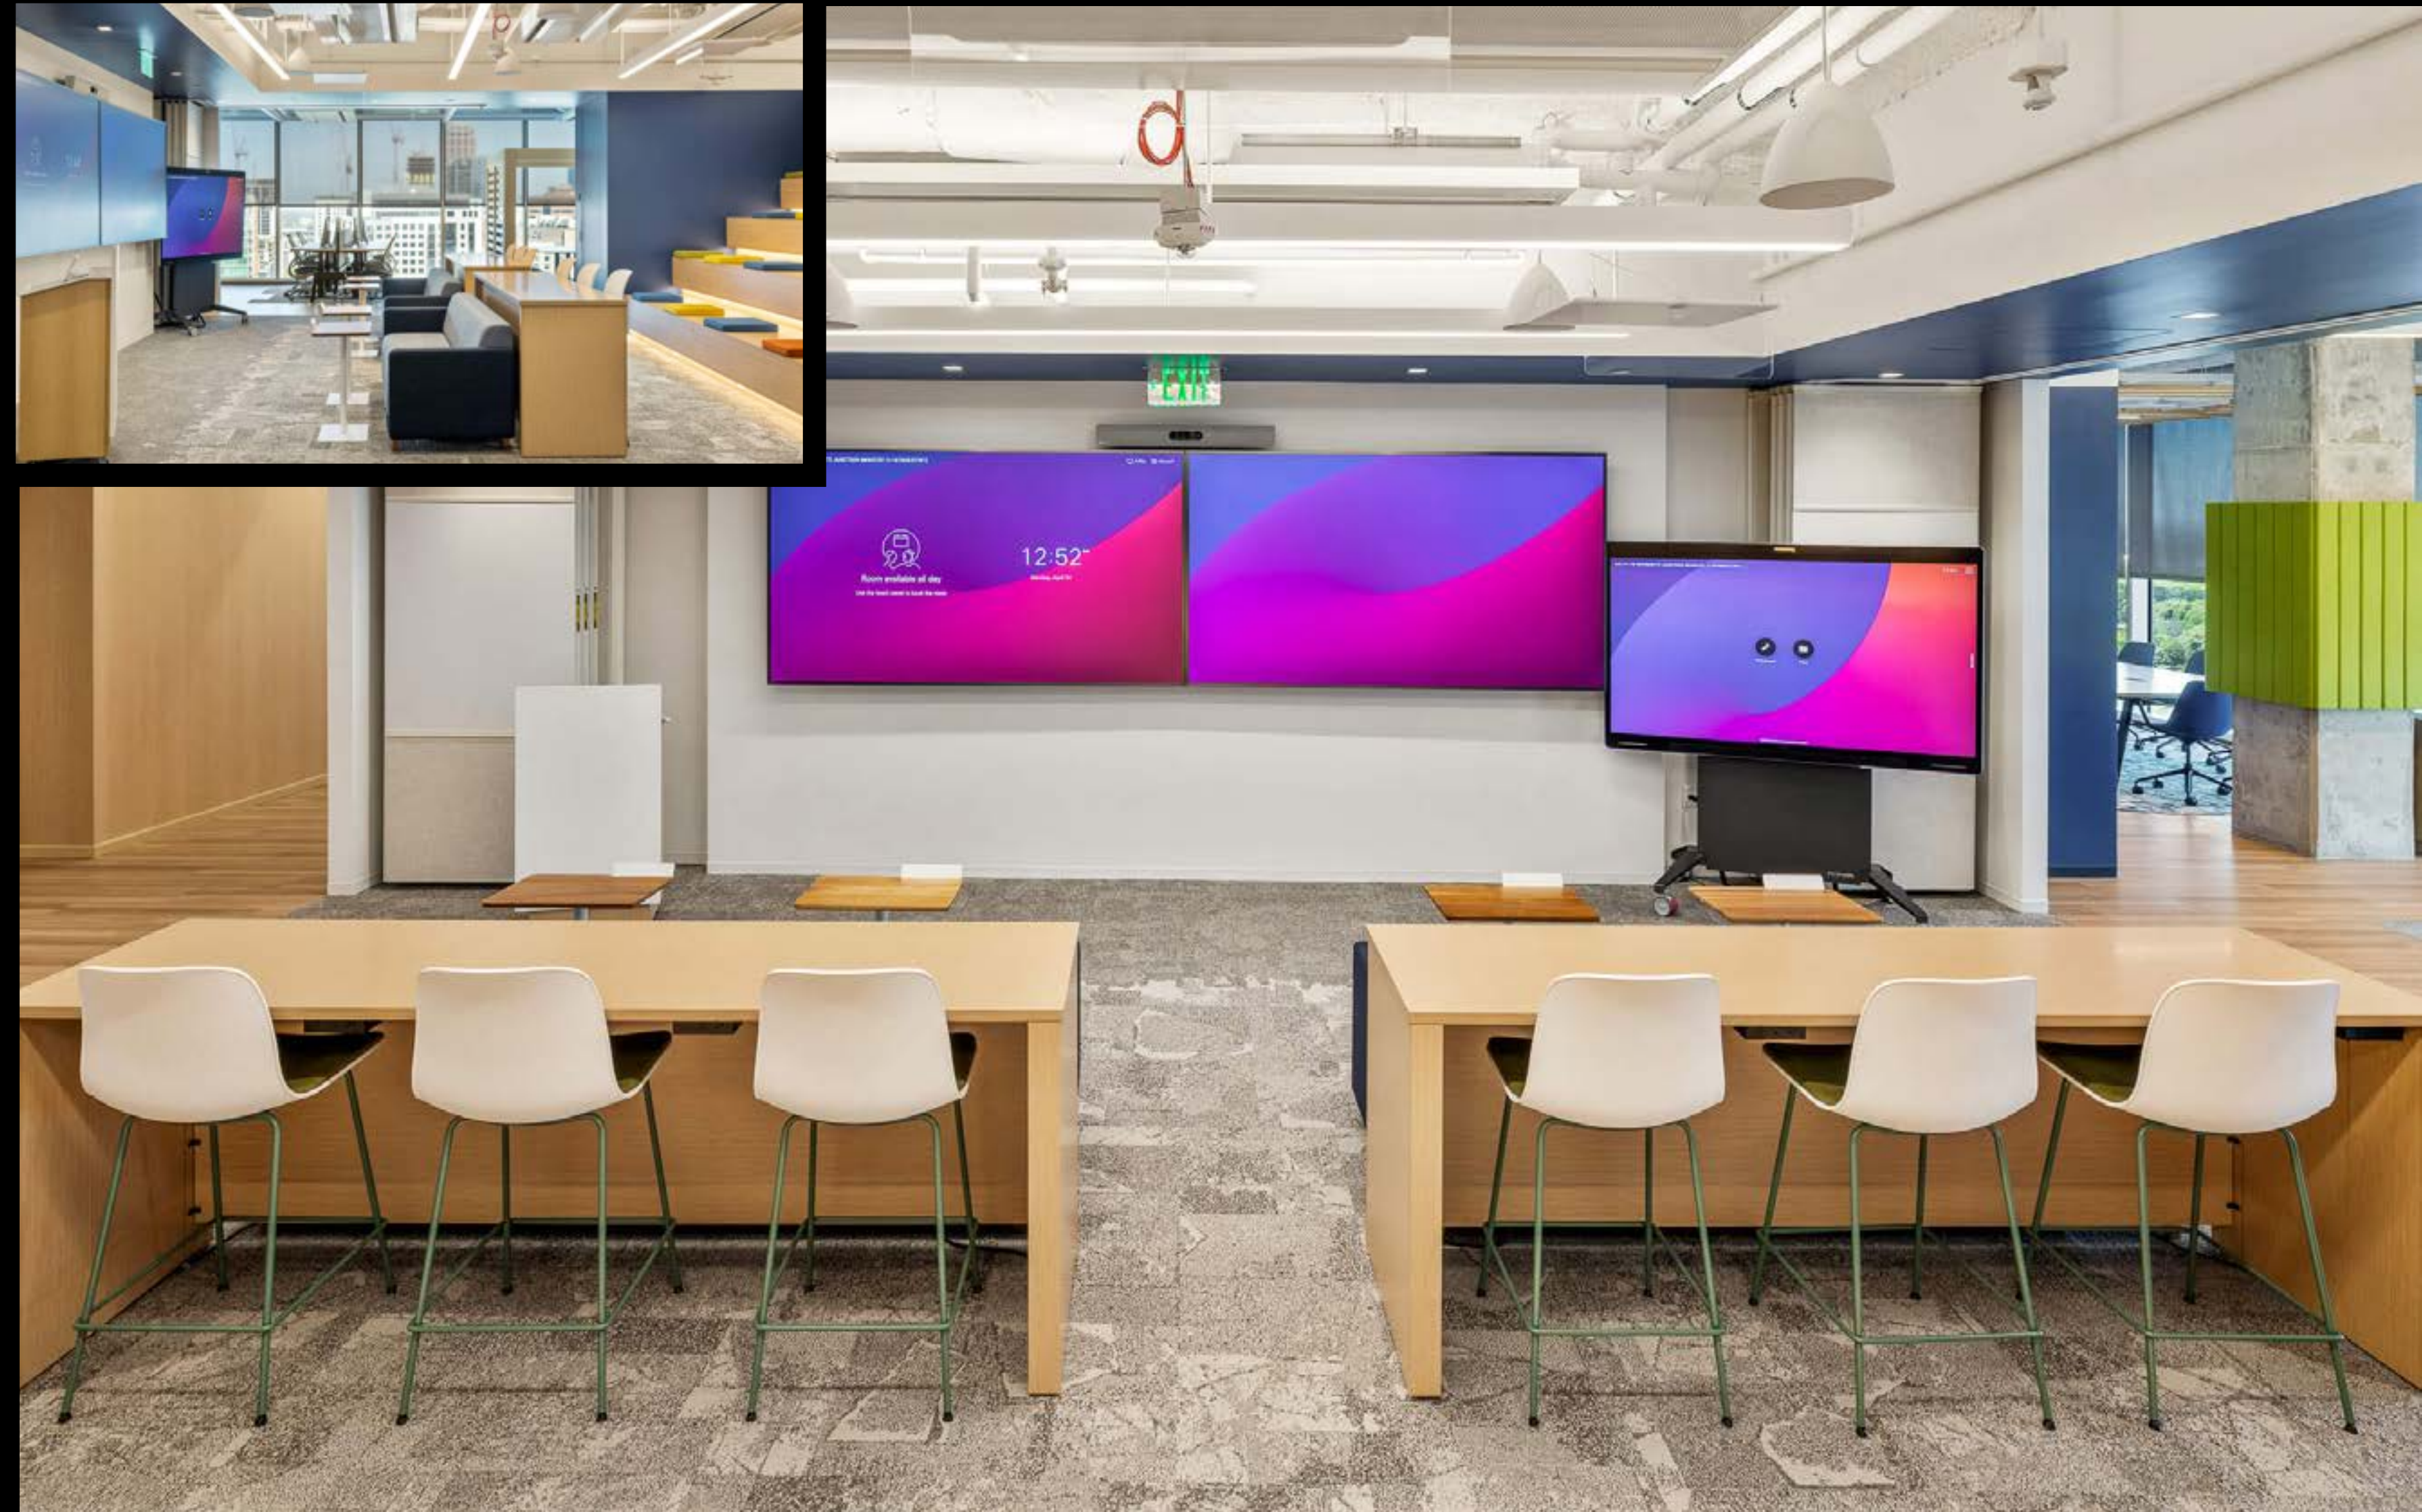

PAGE
57 / 61

Ideal for seminars and training events, these spaces accommodate various group sizes. This design's tiered seating and generously sized dual displays ensure an unobstructed view for all attendees. Both front and rear-mounted cameras, powered by Cisco Room Kit Pro, work in unison to provide an amazing experience for those attending in-person and remotely. The optional Cisco Board Pro 75 further enhances the experience by enabling integrated co-creation and whiteboarding.

Features

- Cisco Room Kit Pro with dual 98" displays (LG, Samsung, Panasonic or Sony)
